## **Development Of Working Memory:**

*The Development of Working Memory* Anik de Ribaupierre, Graham J. Hitch, 1994 This Special Issue of the International Journal of Behavioral Development brings together research on the development of working memory that arises within two quite different approaches

*Working Memory in Development* Valérie Camos, Pierre Barrouillet, 2018-03-05 Working memory is the system responsible for the temporary maintenance and processing of information involved in most cognitive activities and its study is essential to the understanding of cognitive development Working Memory in Development provides an integrative and thorough account of how working memory develops and how this development underpins childhood cognitive development Tracing back theories of cognitive development from Piaget's most influential theory to neo-Piagetian approaches and theories pertaining to the information processing tradition Camos and Barrouillet show in Part I how the conception of a working memory became critical to understanding cognitive development Part II provides an overview of the main approaches to working memory and reviews how working memory itself develops across infancy and childhood In the final Part III the authors explain their own theory the Time Based Resource Sharing TBRS model and discuss how this accounts for the development of working memory as well providing an adequate frame to understanding the role of working memory in cognitive development Working Memory in Development effectively addresses central and debated questions related to working memory and is essential reading for students and researchers in developmental cognitive and educational psychology

*The Development of Working Memory in Children* Lucy Henry, 2011-11-04 Using the highly influential working memory framework as a guide this textbook provides a clear comparison of the memory development of typically developing children with that of atypical children The emphasis on explaining methodology throughout the book gives students a real understanding about the way experiments are carried out and how to critically evaluate experimental research The first half of the book describes the working memory model and goes on to consider working memory development in typically developing children The second half of the book considers working memory development in several different types of atypical populations who have intellectual disabilities and/or developmental disorders In addition the book considers how having a developmental disorder and/or intellectual disabilities may have separate or combined effects on the development of working memory The Development of Working Memory in Children is for undergraduate and postgraduate students taking courses in development child psychology cognitive development and developmental disorders

*Working Memory* Pierre Barrouillet, Valérie Camos, 2014-09-19 Working memory is the cognitive system in charge of the temporary maintenance of information in view of its on-going processing Lying at the centre of cognition it has become a key concept in psychological science The book presents a critical review and synthesis of the working memory literature and also presents an innovative new theory the Time Based Resource Sharing TBRS model Tracing back the evolution of the concept of working memory from its introduction by Baddeley and Hitch in 1974 and the development of their modal model Barrouillet

and Camos explain how an alternative conception could have been developed from the very beginning and why it is needed today This alternative model takes into account the temporal dynamics of mental functioning The book describes a new architecture for working memory and provides a description of its functioning its development the sources of individual differences and hints about neural substrates The authors address central and debated questions about working memory and also more general issues about cognitive architecture and functioning Working Memory Loss and Reconstruction will be essential reading for advanced students and researchers of the psychology of memory **Cognitive Development and Working Memory**

Pierre Barrouillet,Vinciane Gaillard,2010-12-21 This book presents a unique attempt to address issues of working memory by establishing a dialogue between neo Piagetian theorists and researchers specialized in typical and atypical working memory development *Working Memory Capacity* Nelson Cowan,2012-06-12 This book tackles the problem of working memory capacity limits and the future of research on this topic This book will be invaluable to working memory researchers and cognitive psychologists interested in memory **Working Memory** Helen St.

Clair-Thompson,2013 This book presents the latest research in working memory from around the world There are thirteen chapters which are ordered according to three main themes Chapters concerned with developmental differences address the relationships between working memory and childrens learning and school performance the role of working memory in the development of planning associations between working memory and implicit learning and theoretical models that account for visuo spatial working memory development Chapters concerned with component processes address issues of visual feature binding aspects of cognitive load theory the processing of affective stimuli in working memory and the role of working memory in spatial orientation and navigation Finally a section on improvement mechanisms is comprised of chapters related to improving working memory through the differential outcomes procedure applying transcranial alternating stimulation to the dorsolateral prefrontal cortex and methods of cognitive remediation including working memory training both in participants with ADHD and other populations The chapters provide comprehensive reviews as well as presenting new empirical data concerned with these topics They aim to further the current understanding of working memory from developmental cognitive and educational perspectives The book should therefore be of interest to all academics and researchers with an interest in working memory and related skills *Working Memory* Helen St.
