Behavioural Ecological Genetics A Stud:

Behavioural Ecology Etienne Danchin, Luc-Alain Giraldeau, Frank Cézilly, 2008-02-14 Behavioural Ecology gives a fresh contemporary account of the evolutionary and ecological processes that underpin animal behaviour Contributions from subject experts and meticulous editing yield a text with all the qualities of a multi author book but without the potential drawbacks

Social Behaviour Tamás Székely, Allen J. Moore, Jan Komdeur, 2010-11-18 A comprehensive analysis of the genetic ecological and phylogenetic aspects of social behaviour by experts in the field *Behavioral Flexibility in Primates* Clara Jones, 2006-09-10 Numerous figures illustrations and tables integration of new literature and concepts into field of primatology emphasis upon both behavioral and cognitive mechanisms

Evolutionary Behavioral Ecology David Westneat, Charles W. Fox, 2010-04 Evolutionary Behavioral Ecology presents a comprehensive treatment of the evolutionary and ecological processes shaping behavior across a wide array of organisms and a diverse set of behaviors and is suitable as a graduate level text and as a sourcebook for professional scientists

Behavior Genetics, 1979 *Maternal Effects As Adaptations* Timothy A. Mousseau, Charles W. Fox, 1998-06-18 Phenotypic variation is influenced by both genetic and environmental variation One important source of environmental variation is the maternal effect influences of the maternal environment on offspring phenotype

[Encyclopedia of Evolutionary Biology](#), 2016-04-14 Encyclopedia of Evolutionary Biology Four Volume Set is the definitive go to reference in the field of evolutionary biology It provides a fully comprehensive review of the field in an easy to search structure Under the collective leadership of fifteen distinguished section editors it is comprised of articles written by leading experts in the field providing a full review of the current status of each topic The articles are up to date and fully illustrated with in text references that allow readers to easily access primary literature While all entries are authoritative and valuable to those with advanced understanding of evolutionary biology they are also intended to be accessible to both advanced undergraduate and graduate students Broad topics include the history of evolutionary biology population genetics quantitative genetics speciation life history evolution evolution of sex and mating systems evolutionary biogeography evolutionary developmental biology molecular and genome evolution coevolution phylogenetic methods microbial evolution diversification of plants and fungi diversification of animals and applied evolution Presents fully comprehensive content allowing easy access to fundamental information and links to primary research Contains concise articles by leading experts in the field that ensures current coverage of each topic Provides ancillary learning tools like tables illustrations and multimedia features to assist with the comprehension process

Animal Behavior: Mechanisms, Ecology, Evolution Lee C. Drickamer, Stephen H. Vessey, Elizabeth Jakob, 2001-07-17 Designed for a one semester introductory course in Animal Behavior Animal behavior is a broad discipline with investigators and contributions from diverse perspectives including anthropology comparative psychology ecology ethology physiology and zoology The authors goal in this textbook is to use evolutionary principles as a unifying theme to provide students exposure to a number of

approaches to the field of animal behavior They also demonstrate that the varied perspectives used to study behavior are complementary and often integrated they are not mutually exclusive The subtitle Mechanisms Ecology and Evolution reflects the broad themes that dominate the book *BEHAVIOURAL & ECOLOGICAL GENETICS*. 1973 Peter Angus Parsons,

Patterns and Processes in Stream Ecology David Dudgeon, 1992 There are at least two ways of approaching the study of nature One tactic is to investigate a habitat or any convenient local environment with the aim of producing an inventory of the type of organisms found there preferably with some indication of their relative abundance or population densities The second approach concentrates upon what the organisms are doing in the habitat and might involve measuring attributes of groups of animals which tend to exhibit similar interactions or use the same resources such as predators or the animals which eat plant foliage but which are not necessarily closely related In the first case we are asking a descriptive question Which organisms live in the habitat We label them using a scientific name but without additional information this does not provide us with any understanding of the habitat In the second case we ask What are the organisms doing a functional question The two approaches are complementary with the descriptive approach often preceding the functional one but they are nonetheless distinct The ecological literature exhibits a clear dichotomy between these approaches and books tend to focus on either one or the other If the main goal is to introduce the reader to descriptive studies an identification manual with keys and line drawings would be the usual publication If the functional approach is adopted an introduction to ecological patterns and the processes bringing them about would be the subject of the text Rather little is known about the ecology of seasonal tropical freshwaters in general and Hong Kong s freshwaters in particular Moreover there has been no attempt to synthesize the material that is available in the primary scientific literature This book outlines the main ecological patterns both temporal and spatial which characterize Hong Kong streams and rivers Attempts are made to account for the observed patterns by recourse to characteristics of the populations that comprise freshwater communities and the properties and interactions of the individual organisms constituting those populations Attention is centred upon animals although they are not considered to the exclusion of plants The intention here has not been to produce an identification guide indeed it is worth emphasizing that our taxonomic knowledge of Hong Kong running water fauna is restricted as reflected in this text by the use of letters or numbers to designate as yet undescribed species within genera *Animal Behavior Abstracts* ,1994

Behavioural Biology Abstracts ,1992 *Wild Mammals in Captivity* Devra G. Kleiman, Katerina V. Thompson, Charlotte Kirk Baer, 2010-08-15 Zoos aquaria and wildlife parks are vital centers of animal conservation and management For nearly fifteen years these institutions have relied on *Wild Mammals in Captivity* as the essential reference for their work Now the book reemerges in a completely updated second edition *Wild Mammals in Captivity* presents the most current thinking and practice in the care and management of wild mammals in zoos and other institutions In one comprehensive volume the editors have gathered the most current information from studies of animal behavior advances in captive breeding research in

physiology genetics and nutrition and new thinking in animal management and welfare In this edition more than three quarters of the text is new and information from more than seventy five contributors is thoroughly updated The standard text for all courses in zoo biology Wild Mammals in Captivity will in its new incarnation continue to be used by zoo managers animal caretakers researchers and anyone with an interest in how to manage animals in captive conditions *Methodology Ecological, Genetic, and Nutritional Effects on Growth* Frank Falkner, J.M. Tanner, 1986-03-31 **Evolutionary Behavioral Ecology** David Westneat, Charles W. Fox, 2010-04 Evolutionary Behavioral Ecology presents a comprehensive treatment of the evolutionary and ecological processes shaping behavior across a wide array of organisms and a diverse set of behaviors and is suitable as a graduate level text and as a sourcebook for professional scientists The American Midland Naturalist, 1979 A refereed broad spectrum journal publishing basic research in diverse disciplines in biology and varied taxa Animal Behaviour Abstracts, 1992 **The Zoological Record**, 2000 **Current Advances in Ecological & Environmental Sciences**, 1996 Report of the Annual Meeting of the South African Association for the Advancement of Science, 1997
