

## Underwater Challenge

He was a misfit—a space-ship engineer who had developed such fear of outer space that he could no longer function.

Permanently separated from his wife and children on Mars, he faced a terrible future back on Earth—unless through psychiatry he could create a new life as a warden of the oceans' depths.

Taut with excitement and suspense, this is a thrilling novel of tomorrow and a fascinating picture of the weird and sometimes terrifying life beneath the seas in a future when submarine patrols harvest the water's wealth to feed the world.

*"Superior adventure fiction by one of the best performers in his field."*
