**DEEP thoughts that can
change your perspective.**

**It would be cool if after you

times you almost died.**

**You probably heard voices
as a child and don't
remember it now.**

**You can always see your
nose but your brain decides
to ignore it.**

**Be careful who you trust,
even salt looks like sugar.**

**You and someone else are
probably reading this at the
same time.**

**This might be the last time
we will see each other and
never again. I wish you all
the best.**

Deeply Thoughts:

Open Your Eyes Toward Living More Deeply in the Present Gail J. Stearns, 2010-10-01 In order to discover inner peace and peace in our world we will need to let go of traditional understandings of pain and suffering as God's will. We will need to stop claiming that Christianity contains elite exclusive truths. We learn here from the Jesus of the Gospel of Mark how to open our eyes and awaken to the Presence of God here and now. Gail Stearns brings insight from biblical scholars, spiritual leaders, and her own experience as a pastor and university teacher to move us to a place where we can dwell more deeply in the present and live in a more compassionate world.

A Compendium of the Theological and Spiritual Writings of Emanuel Swedenborg Emanuel Swedenborg, 1856

Culture, Thought, and Development Larry Nucci, Geoffrey B. Saxe, Elliot Turiel, 2000-10-01 In this volume the reader will find a host of fresh perspectives. Authors seek to reconceptualize problems offering new frames for understanding relations between culture and human development. Contributors include scholars from the disciplines of philosophy, law, theology, anthropology, developmental psychology, neuro and evolutionary psychology, linguistics, cognitive science, and physics. To help organize the discussions the volume is divided into three parts. Each part reflects an arena of current scholarly activity related to the analysis of culture, cognition, and development. The editors cast a wide but carefully crafted net in assembling contributions to this volume. Though the contributors span a wide range of disciplines, features common to the work include both clear departures from the polemics of nature/nurture debates and a clear focus on interacting systems in individuals' activities leading to novel developmental processes. All accounts are efforts to mark new and productive paths for exploring intrinsic relations between culture and development.
