The Spiritual Doorway in the Brain Kevin Nelson, 2010-12-30 The world's leading neurologist on out of body and near death experiences shows that spirituality is as much a part of our basic biological makeup as our sex drive or survival instinct If Buddha had been in an MRI machine and not under the Bodhi tree when he attained enlightenment what would we have seen on the monitor Dr Kevin Nelson offers an answer to that question that is beyond what any scientist has previously encountered on the borderlands of consciousness In his cutting edge research Nelson has discovered that spiritual experiences take place in one of the most primitive areas of the brain In this eloquent inspired and reverent book he relates the moving stories of patients and research subjects brain scan analysis evolutionary biology and beautiful examples of transcendence from literature to reveal the machinery in our heads that enables us to perceive miracles whether you are an atheist Buddhist or the most devout Catholic The patients and people Nelson discuss have had an extremely diverse set of spiritual experiences from arguing with the devil sitting at the foot of their hospital bed to seeing the universe synchronize around the bouncing of the ball in a pinball machine However the bizarre experiences don't make the people seem like freaks they seem strangely very much like us in surprising ways Ultimately Nelson makes clear that spiritual experiences are not the exception in human life but rather an inescapable and precious part of every one of us
