Taino Indian Myth and Practice William F. Keegan, 2022-05-03 Applying the legend of the stranger king to Caonabo the mythologized Taino chief of the Hispaniola settlement Columbus invaded in 1492 Keegan examines how myths come to resonate as history created by the chaotic interactions of the individuals who lived the events of the past as well as those who write and read about them The stranger king story told in many cultures is that of a foreigner who comes from across the water marries the king s daughter and deposes the king In this story Caonabo the most important Ta no chief at the time of European conquest claimed to be imbued with Taino divinity while Columbus determined to establish a settlement called La Navidad described himself as the Christbearer Keegan s ambitious historical analysis knitting evidence from Spanish colonial documents together with data gathered from the archaeological record provides a new perspective on the encounters between the two men as they vied for control of the settlement a survey of the early interactions of the Tainos and Spanish people and a complex view of the interpretive role played by historians and archaeologists Presenting a new theoretical framework based on chaos and complexity theories this book argues for a more comprehensive philosophy of archaeology in which oral myths primary source texts and archaeological studies can work together to reconstruct a particularly rich view of the past A volume in the Florida Museum of Natural History Ripley P Bullen Series
