Second Language Task-Based Performance Peter Skehan, 2018-07-04

Second Language Task Based Performance is the first book to synthesize Peter Skehan's theoretical and empirical contributions all in one place. With three distinct themes explored in each section: theory, empirical studies and assessment. Skehan's influential body of work is organized in such a way that it provides an updated reflection on the material and makes it relevant to today's researchers. Also in each section an early publication is matched by at least one later publication followed by a newly written commentary chapter, the combination of which provides the important function of offering a wider ranging discussion. This book is an invaluable resource for researchers interested in second language task based research or SLA more generally.

Planning and Task Performance in a Second Language Rod Ellis, 2005-01-01

The last decade has seen a growing body of research investigating various aspects of L2 learners performance of tasks. This book focuses on one task implementation variable: planning. It considers theories of how opportunities to plan a task affect performance and tests claims derived from these theories in a series of empirical studies. The book examines different types of planning: i.e. task rehearsal, pre-task planning and within task planning, addressing both what learners do when they plan and the effects of the different types of planning on L2 production. The choice of planning as the variable for investigation in this book is motivated both by its importance for current theorizing about L2 acquisition in particular with regard to cognitive theories that view acquisition in terms of information processing and its utility to language teachers and language testers, for unlike many other constructs in SLA, planning lends itself to external manipulation. The study of planning then provides a suitable forum for demonstrating the interconnectedness of theory, research and pedagogy in SLA.
