## Problem Solving

This CD-ROM guide is a treasure box of purposeful, leveled instruction lessons matched to current objectives for the ten-book Problem Solving Collection of the "Sing & Read"™ Math Literacy Series. The lessons introduce and reinforce appropriate math concepts with singing and movement. Best of all, each concept is intentionally connected to your young mathematicians' everyday lives.

The resources for each storybook include ideas for

- introducing the math concept
- ideas for using the book as an assessment tool
- creative lessons for teaching and practicing the math concept at several different levels
- introducing the book
- learning center and station activities
- home connection activities

This easy-to-read CD-ROM guide also includes objectives matched to each activity, reproducible family notes, sorting mats, and picture cards. You have everything you need to differentiate instruction for every child.

In addition to meeting the needs of young math learners, the Problem Solving Collection provides positive literacy experiences for young children. As children sing and read the stories, answer the questions, and actively participate in the math activities, they are developing beginning literacy skills.

*Humanism and Behaviorism in Physical Education* Robert E. Gensemer, Robert J. Krajewski, Robert Baird Shuman, 1979  
This book offers analyses applications and a combined form of behaviorism and humanism as they relate to the teaching of physical education The composition of the two systems is explored pragmatically with an overall objective of assisting teachers in their endeavors to make teaching and learning more efficient effective and rewarding The differences between the two philosophies are apparent humanism assigns the responsibility for learning to the student while behaviorism assigns the responsibility for learning to the teacher Humanism is concerned with self directed activity such as creativity and self discovery Applying humanism to a physical education course entails creating an environment of psychological intellectual and physical movement freedom The behaviorist model of teaching represents a branch of psychology which relies on a stimulus response view of education The central idea of behaviorism is that behavior is affected by its consequences and the future occurrence of behaviors is influenced by the way in which the environment usually people responds to those behaviors An effective combination of both systems which at first glance seems antithetical would use the following steps 1 identify specific target behaviors 2 select the educational experiences 3 organize the educational experiences and 4 evaluate the effect FG
