 - try to compare the changes we observe to the baselines
- **Evaluation** of data collected
 - process of interpreting data that could lead us to the next steps
- Determination of **diagnosis** based on impairments, functional limitations, and disability
 - categorize the conditions and we get a clear clinical picture of the condition
 - *how we PTs diagnosed based on the disability*
- Establishment of a **prognosis and plan of care** based on patient-oriented goals
 - prognosis - prediction of the outcome
