Encoding & Neural Decoding?: Neural Decoding to decipher Brain activity to treat Paralysis, Rheumatoid arthritis &
Epilepsy.* Dr. Hakim Saboowala., 2019-10-08 Scientists and engineers have been working for decades to tap into the human
nervous system network and crack the neural code by decoding neural signals and learning how to speak the language of the
nervous system The human nervous system is a vast network carrying not only sensory and movement information but also
information to and from our organs intimately linking it to our overall health Progress has been made in developing neural

decoding methods to decipher brain activity and bioelectronic technologies to treat Rheumatoid arthritis Paralysis Epilepsy and For diagnosing brain related diseases such as Parkinson s and Alzheimer s disease This work combined neural decoding and neurostimulation methods to translate and re route signals around damaged neural pathways within the central nervous system By extending these methods to decipher neural messages in the peripheral nervous system status information from our bodily functions and specific organs could be gained This one day could allow real time diagnostics to be performed to give us a deeper insight into a patient s condition or potentially even predict disease or allow early diagnosis The future of bioelectronic medicine is extremely bright and is wide open as new diagnostic and treatment options are developed for patients around the world An attempt has been made in this Booklet to include a recent first in human study involving paralysis a paralyzed male study participant regained movement in his hand years after his injury through the use of a Bioelectronic Neural Bypass for the enthusiastic Medicos Dr H K Saboowala Bom M R S H London *Medical Image Computing and Computer Assisted Intervention - MICCAI 2022* Linwei Wang, Qi Dou, P.
