Deep Within:

Deep Within Katheryn Shelly, 2021-08-16 Deep within the recess of your mind lie your cellular memories of centuries gone by It is up to you to recall all of these and learn to treasure the lessons received Based on the author's experiences with past life memories this gripping historical novel follows the tale of King Bjorn a Viking warrior who becomes lost at sea with his crew during a violent storm When they finally come ashore in a new land they learn to survive make peace with the Indigenous Peoples and endure the tragedies that soon unfold Through all their trials they must ask themselves whether they should settle down and make a life in this strange unfamiliar land or find a way to journey back home to the ones they have left behind

Joy From Deep Within Hemant Gupta, 2010-12-20 What do we all humans have in common We are all incorrigible seekers of bliss or joy Our minds are wired to be happy At least that is what our modern scientific studies contend Yet most of us know we are not joyful In fact we struggle most of time to be and stay happy What has gone wrong I have attempted to answer this question in this book It has been my own journey to arrive at lasting happiness and joy It builds on the informational computational foundation of our universe developed in the first book of this series *Road to Digital Divine* It combines latest science of mind and matter with spirituality putting forth a new concept of our self the quantum self rooted in the informational nature of our being Most of us are familiar with our physical self that we see in the mirror It however does not define us completely What is critical for us to know is our informational self Knowing the true nature of this self and acting accordingly is essential for us humans to achieve good emotional health and realize lasting joy in our lives In fact not knowing or ignoring the messages from this essential nature of our self is the leading reason for suffering in our human society I paint this self as a tale of three minds emotional rational and cosmic The three minds computationally synchronized lead to the birth of informational self This self is a computationally astute structure It computes using two modes of computation Each of these modes lead to two extreme personalities One binary computation which leads to a nature of self that courts I me and mine tendencies I have called this as our binary self And the other quantum computation which leads to a nature of self with us we and ours tendencies I call this as our quantum self Both these nature of self are quite familiar in today's society The binary information processing leads to egoic entity which is present in most of us It dominates today's human society It is responsible for incredible progress that humans have made as a surviving species but it is also responsible for most of the sufferings that modern humans face today The quantum self has saintlike nature It feels love empathy and oneness with others It is truthful and always stays in the company of divinity It is responsible for widespread altruism in nature and in humans With two selves of very different nature in one body modern humans have learned the meaning of the word suffering Which self will win Which is our true self Understanding of this fact is not trivial In fact it is nothing short of enlightenment as I explain how the understanding of our true self can lead one on to this path It can make a profound change in one's perspective The joy pouring from deep within is at the root of this reality *Optical*

Microendoscopy for Imaging Cells Lying Deep Within Live Tissue Robert Juson Barretto,2010 Optical microendoscopy is an emerging modality for imaging in live subjects Using gradient refractive index GRIN microlenses microendoscopy enables subcellular resolution imaging in deep tissues that are inaccessible by traditional imaging techniques We present a platform of methods and technologies that build upon GRIN microendoscopy 1 miniaturized microscopes for imaging in awake behaving animals 2 methods for imaging contractile dynamics in the muscles of animal and human subjects 3 chronic brain preparations that allow for longitudinal examinations of subcellular neuronal features and disease progression and 4 novel microendoscope probes whose imaging capabilities approach that of standard water immersion microscope objectives When combined with the broad sets of available fluorescent reporters and minimally invasive surgical preparations the work described in this dissertation enables sophisticated experimental designs for probing how cellular characteristics may underlie or explain behavior in models of both healthy and diseased states *Searching for Treasures* Andy
