Complexities Women In Mathematics:

Complexities Bettye Anne Case, Anne M. Leggett, 2016-05-31 Sophie Germain taught herself mathematics by candlelight huddled in her bedclothes Ada Byron Lovelace anticipated aspects of general purpose digital computing by more than a century Cora Ratto de Sadosky advanced messages of tolerance and equality while sharing her mathematical talents with generations of students This captivating book gives voice to women mathematicians from the late eighteenth century through to the present day It documents the complex nature of the conditions women around the world have faced and continue to face while pursuing their careers in mathematics The stories of the three women above and those of many more appear here each one enlightening and inspiring The earlier parts of the book provide historical context and perspective beginning with excursions into the lives of fifteen women born before 1920 Included are histories of collective efforts to improve women's opportunities in research mathematics In addition a photo essay puts a human face on the subject as it illustrates women's contributions in professional associations More than eighty women from academe government and the private sector provide a rich range of insights and strategies for creating workable career paths while maintaining rewarding personal lives The book discusses related social and cultural issues and includes a summary of recent comparative data relating to women and men in mathematics and women from other sciences First person accounts provide explicit how to's many narratives demonstrate great determination and perseverance Talented women vividly portray their pleasure in discovering new mathematics The senior among them speak out candidly interweaving their mathematics with autobiographical detail At the beginning of a new century women at all stages of their careers share their outlooks and experiences Clear engaging and meticulously researched Complexities will inspire young women who are contemplating careers in mathematics and will speak to women in many fields of endeavor and walks of life

Women in Mathematics Janet L. Beery, Sarah J. Greenwald, Jacqueline A. Jensen-Vallin, Maura B. Mast, 2017-12-02 This collection of refereed papers celebrates the contributions achievements and progress of female mathematicians mostly in the 20th and 21st centuries Emerging from the themed paper session The Contributions of Women to Mathematics 100 Years and Counting at MAA's 2015 MathFest this volume contains a diverse mix of current scholarship and exposition on women and mathematics including biographies histories and cultural discussions The multiplicity of authors also ensures a wide variety of perspectives In inspiring and informative chapters the authors featured in this volume reflect on the accomplishments of women in mathematics showcasing the changes in mathematical culture that resulted as more women obtained tenure track and tenured academic positions received prestigious awards and honors served in leadership roles in professional societies and became more visibly active in the mathematical community Readers will find discussions of mathematical excellence at Girton College Cambridge in the late 19th and early 20th centuries of perseverance by Polish women in mathematics during and after World War II and by Black women in mathematics in the United States from the 1880s onward and of the impact of outreach programs ranging

from EDGE's promotion of graduate education to the Daughters of Hypatia dance performances. The volume also provides informative biographies of a variety of women from mathematics and statistics, many of them well known and others less well known, including Charlotte Angas Scott, Emmy Noether, Mina Rees, Gertrude Cox, Euphemia Lofton Haynes, Norma Hernandez, Deborah Tepper Haimo, and Teri Perl. These essays provide compelling reading for a wide audience, including mathematicians, historians of science, teachers of mathematics, and students at the high school, college, and graduate levels. Anyone interested in attracting more girls and women as students, faculty, and/or employees will also find this volume engaging and enlightening.

Fifty Years of Women in Mathematics Janet L. Beery, Sarah J. Greenwald, Cathy Kessel, 2022-04-21. The Association for Women in Mathematics (AWM), the oldest organization in the world for women in mathematics, had its fiftieth anniversary in 2021. This collection of refereed articles, illustrated by color photographs, reflects on women in mathematics and the organization as a whole. Some articles focus on the situation for women in mathematics at various times and places, including other countries. Others describe how individuals have shaped AWM and, in turn, how the organization has impacted individuals as well as the broader mathematical community. Some are personal stories about careers in mathematics. **Fifty Years of Women in Mathematics: Reminiscences, History, and Visions for the Future** of AWM covers a span from AWM's beginnings through the following fifty years. The volume celebrates AWM and its successes but does not shy away from its challenges. The book is designed for a general audience. It provides interesting and informative reading for people interested in mathematics, gender equity, or organizational structures: teachers of mathematics, students at the high school, college, and graduate levels, and members of more recently established organizations for women in mathematics and related fields, or prospective founders of such organizations.

Loving and Hating Mathematics Reuben Hersh, Vera John-Steiner, 2010-12-13. An exploration of the hidden human emotional and social dimensions of mathematics. Mathematics is often thought of as the coldest expression of pure reason. But few subjects provoke hotter emotions and inspire more love and hatred than mathematics. And although math is frequently idealized as floating above the messiness of human life, its story is nothing if not human. Often it is all too human. **Loving and Hating Mathematics** is about the hidden human emotional and social forces that shape mathematics and affect the experiences of students and mathematicians. Written in a lively, accessible style and filled with gripping stories and anecdotes, **Loving and Hating Mathematics** brings home the intense pleasures and pains of mathematical life. These stories challenge many myths, including the notions that mathematics is a solitary pursuit and a young man's game, the belief that mathematicians are emotionally different from other people, and even the idea that to be a great mathematician, it helps to be a little bit crazy. Reuben Hersh and Vera John-Steiner tell stories of lives in math from their very beginnings through old age, including accounts of teaching and mentoring, friendships and rivalries, love affairs and marriages, and the experiences of women and minorities in a field that has traditionally been unfriendly to both. Included here are also stories of people for whom mathematics has been an immense solace during times of crisis, war, and even

imprisonment as well as of those rare individuals driven to insanity and even murder by an obsession with math This is a book for anyone who wants to understand why the most rational of human endeavors is at the same time one of the most emotional

Math through the Ages: A Gentle History for Teachers and Others Expanded Second Edition William P. Berlinghoff, Fernando Q. Gouvêa, 2021-04-29 Where did math come from Who thought up all those algebra symbols and why What is the story behind negative numbers the metric system quadratic equations sine and cosine logs The 30 independent historical sketches in Math through the Ages answer these questions and many others in an informal easygoing style that is accessible to teachers students and anyone who is curious about the history of mathematical ideas Each sketch includes Questions and Projects to help you learn more about its topic and to see how the main ideas fit into the bigger picture of history The 30 short stories are preceded by a 58 page bird s eye overview of the entire panorama of mathematical history a whirlwind tour of the most important people events and trends that shaped the mathematics we know today What to Read Next and reading suggestions after each sketch provide starting points for readers who want to learn more This book is ideal for a broad spectrum of audiences including students in history of mathematics courses at the late high school or early college level pre service and in service teachers and anyone who just wants to know a little more about the origins of mathematics

A to Z of Women in Science and Math Lisa Yount, 2007 From ancient times to the present day scientifically inclined women in many cultures have had to battle against the traditional belief that men are more cognitively adept than women At times throughout history women were persecuted for their attempts to break down traditional gender barriers Today women scientists and mathematicians must continue to defend the quality of their work and demand the respect they deserve in the mathematical and scientific communities A to Z of Women in Science and Math Revised Edition profiles 195 women who fought against these stereotypes throughout history and all over the world to forge new discoveries and theories that would eventually change the way we view science This thoroughly revised book updates the story of each individual to the present day and features 38 new profiles Among the profiles included are those of chemists astronomers geologists environmental scientists and a range of other professions and careers In addition new photographs have been added and the bibliography has been updated Subject indexes allow the reader to search by such professions as microbiology and paleontology Additional subject indexes organize individuals by country of birth country of major scientific activity and year of birth
