Author Michael J Zerbe argues that inclusion of scientific discourse is crucial because of this rhetoric's status as the dominant discourse in western culture. The volume draws on Lyotard, Foucault, and Althusser to argue that while important theorists such as these have recognized the dominance of scientific discourse, rhetoric and composition has not to its detriment. The text illustrates that scientific discourse remains a miniscule part of the enterprise of rhetoric and composition and thus the field is not fulfilling its mission of providing students with the writing and reading skills they need to live and work in a science and technology dependent society. Zerbe provides an analysis of science popularizations and demonstrates how these works can be used to contextualize primary scientific research. He also presents three pedagogical scenarios each built around a carefully chosen accessible example of scientific discourse that demonstrate how articles from scientific journals can be used in writing courses. Only by gaining a meaningful fluency in this discourse, one that is not offered by science textbooks, can a more sophisticated scientific literacy be assured. *Composition and the Rhetoric of Science* effectively explores the relatively limited amount of work done in rhetoric and composition on scientific discourse and questions this state of affairs. Zerbe presents for the first time cultural studies and science literacy as gateways for incorporating scientific discourse into first year writing courses.

[Beer and Circus](#) Murray Sperber, 2011-04-01 *Beer and Circus* presents a no holds barred examination of the troubled relationship between college sports and higher education from a leading authority on the subject. Murray Sperber turns common perceptions about big time college athletics inside out. He shows for instance that contrary to popular belief the money coming in to universities from sports programs never makes it to academic departments and rarely even covers the expense of maintaining athletic programs. The bigger and more prominent the sports program the more money it siphons away from academics. Sperber chronicles the growth of the university system, the development of undergraduate subcultures, and the rising importance of sports. He reveals television's ever more blatant corporate sponsorship conflicts and describes a peculiar phenomenon he calls the Flutie Factor, the surge in enrollments that always follows a school's appearance on national television, a response that has little to do with academic concerns. Sperber's profound re-evaluation of college sports comes straight out of today's headlines and opens our eyes to a generation of students caught in a web of greed and corruption, deprived of the education they deserve. Sperber presents a devastating critique not only of higher education but of national culture and values. *Beer and Circus* is a must read for all students and parents, educators and policy makers.
