Companion Text For Growing Up:

Growing Up in Nineteenth-Century Ireland Mary Hatfield, 2019-10-03 Why do we send children to school Who should take responsibility for children's health and education Should girls and boys be educated separately or together These questions provoke much contemporary debate but also have a longer often overlooked history Mary Hatfield explores these questions and more in this comprehensive cultural history of childhood in nineteenth century Ireland Many modern ideas about Irish childhood have their roots in the first three quarters of the nineteenth century when an emerging middle class took a disproportionate role in shaping the definition of a good childhood This study deconstructs several key changes in medical care educational provision and ideals of parental care It takes an innovative holistic approach to the middle class child's social world by synthesising a broad base of documentary visual and material sources including clothes books medical treatises religious tracts photographs illustrations and autobiographies It offers invaluable new insights into Irish boarding schools the material culture of childhood and the experience of boys and girls in education

Queer and Trans Perspectives on Teaching LGBT-themed Texts in Schools Mollie V. Blackburn, Caroline T. Clark, Wayne J. Martino, 2018-12-07 This book focuses on queering texts with lesbian gay bisexual and or transgender LGBT themes in collaboration with students young to young adult and their teachers both pre and in service It strives to generate knowledge and deeper understandings of the pedagogical implications for working with LGBT themed texts in classrooms across grade levels The contributions in this book offer explicit implications for pedagogical practice considering literature for children and young adults and work in elementary school high school and university classrooms and schools They give insights on exploring how queer and trans theories might inform the teaching and learning of English language arts with great respect to people who live their lives beyond hegemonic heteronormativity and cisnormativity They provide wisdom on how to provoke foster and navigate complicated conversations about sexuality queer desire gender creativity gender independence and trans inclusivity In addition they show how all of these are informed by an epistemological and ontological understanding of gender embodiment as a process of becoming They offer insights into how queer and trans theories as informed and driven by trans non binary and gender diverse scholars themselves can move all of us beyond LGBTQ inclusivity and inform reading discussing teaching and learning in all of the classrooms and school contexts where we live and work This volume was originally published as a special issue of *Discourse Studies in the Cultural Politics of Education*

Developments Erica Burman, 2008-02-19 How does developmental psychology connect with the developing world What do cultural representations tell us about the contemporary politics of childhood What is the political economy of childhood This companion volume to Burman's *Deconstructing Developmental Psychology* helps us to explain why questions around children and childhood their safety their sexuality their interests and abilities their violence have so preoccupied the late twentieth and twenty first centuries In this increasingly post industrial post colonial and multicultural world this book identifies

analytical and practical strategies for improving how we think about and work with children Drawing in particular on feminist and postdevelopment literatures the book illustrates how and why reconceptualising our notions of individual and human development including those informing models of children s rights and interests will foster more just and equitable forms of professional practice with children and their families The book brings together completely new previously unpublished material alongside revised and updated papers to present a cutting edge and integrated perspective to the field Burman offers a key contribution to a set of urgent debates engaging theory and method policy and practice across all the disciplines that work with or lay claim to children s interests *Developments* presents a coherent and persuasive set of arguments about childhood culture and professional practice so that the sustained focus across a range of disciplinary arenas psychology education cultural studies child rights gender studies development policy and practice social policy strengthens the overall argument of each chapter It will be invaluable to teachers and students in psychology childhood studies and education as well as researchers in gender studies It will also be a must read for professionals working with children and adolescents
