Container Gardening
Stephanie Donaldson, 2003 [Container Gardening Guide](#) Florence J Martin, 2021-02-12 You can use single large containers for outdoor decoration but also consider arranging groups of pots both small and large on stairways terraces or anywhere in the garden Clusters of pots can contain a collection of favorite plants hen and chicks or herbs used both for ornament and for cooking for example or they may feature annuals dwarf evergreens perennials or any other plants you d like to try Houseplants summering outdoors in the shade also make a handsome addition to container gardening Window boxes and hanging baskets offer even more ways to add instant color and appeal Containers planted with a single species rosemary or a bold variegated ornamental grass for example can be stunning garden accents Containers planted with a mix of plants are fun to create and offer almost unlimited possibilities of combinations The best combinations depend on plants that feature handsome foliage and flowers produced over a long bloom season Keep in mind that it s easier to grow plants in large containers than small ones That s because large containers hold more soil which stays moist longer and resists rapid temperature fluctuations Small hanging baskets are especially prone to drying out and during hot summer weather you may have to water them twice a day to keep plants alive It s also important to decide what plant you want to grow in each container Several factors help determine how large and deep the container must be Consider the size and shape of a plant s root system whether it is a perennial annual or shrub and how rapidly it grows Rootbound plants which have filled up every square inch of the soil available dry out rapidly and won t grow well Choose a large pot or tub for a mixed planting one that will offer enough root space for all the plants you want to grow Light colored containers keep the soil cooler than dark containers The maximum size and weight of a container is limited by how much room you have what will support it and whether or not you plan to move it If your container garden is located on a balcony or deck be sure to check how much weight the structure will safely hold
