and unlike the Alps the changes have been minimal 62 walks are described Some need simple climbing skills but most are straightforward In addition two routes are described to the tops of Elbruz the highest mountain in Europe This is the first modern book of its kind by Russian authors There are some very easy routes across the Main Range following good wide paths but the fact is that the central part from the Klukhor to Mamison'sky passes cannot offer such a boon It does not mean you have to climb to get over the Range but you should not expect a comfortable path up to the saddle and you have to be ready for scree grass and snow slopes Not a big hardship considering the reward in calm and seclusion so rare nowadays
