Philip Hoare wrote of it James MacDonald Lockhart puts the rapture back in the raptor This is in the moment writing raw in beak and claw With its gorgeously felt sense of life and place Raptor rips at its words turning them into exquisite portraits of the utter wild shaping soaring obsessive beauty out of the British landscape and its imperial birds **Birds in Scotland**

Valerie M. Thom, 2010-11-30 The most important work on the birds of Scotland ever published British Birds This comprehensive study and review of the birds in Scotland follows on from where the celebrated two volumes of The Birds of Scotland 1953 by Dr Baxter and Miss Rintoul left off It does more than that however since not only has there been a profound increase in ornithological coverage and data as reflected in the species accounts there have also been great changes in habitat and environment since the days of Baxter there are also brief summaries of earlier data based on the researches of Baxter Rintoul In all 497 species are dealt with The texts of major species accounts are complemented by 173 distribution maps and many tables of relevant data and there are 129 species drawings by a team of artists under the editorship of Donald Watson who also contributes chapter head pieces and other drawings A section of photographs illustrates the varied habitats typical of Scotland today There are further appendices and an extensive bibliography The book will be of great interest to all birdwatchers in Scotland but of special value too to the many thousands of birdwatching visitors from elsewhere in these islands and from countries abroad The Scottish Ornithologists Club for whom the book is published and all whose records and researches made the author's work possible have reason to be proud of Valerie Thom's achievement
