College of Science and Technology, 1912 *Adjusting to a New Technology* Elhanan Helpman, Antonio Rangel, 1998 In this paper we study how aggregate output responds to the arrival of a new General Purpose Technology GPT by looking at adjustment mechanisms that operate through labor markets We show that under a wide set of circumstances the arrival of a new GPT that raises long run output can trigger a recession in the short run Furthermore we characterize

features of the GPT that produce a cyclical adjustment path An initial recession occurs whenever a higher education level is required to operate the new GPT But a recession can also occur when the new GPT has lower educational requirements A cyclical adjustment path is more likely when inexperienced workers are less productive with the new technology and the faster productivity rises with experience in the new sector Tech Engineering News ,1922 *California.
