Without Compassion, There Is No Healthcare Brian D. Hodges, Gail Paech, Jocelyn Bennett, 2020-11-18 New technologies are transforming healthcare work and changing how patients interact with healthcare providers As artificial intelligence systems robotics and data analytics become more sophisticated some clinical tasks will become obsolete and others will be reconfigured While it is not possible to predict these developments precisely it is important to understand their inevitability and to prepare for the changes that lie ahead Without Compassion There Is No Healthcare argues that compassion must be upheld as the bedrock and guiding purpose of healthcare work Emerging technologies have the potential to subvert this purpose but also to enable and expand it creating new conduits for compassionate care Cultivating these benefits and guarding against potential threats will require vigilance and determination from healthcare providers educators leaders patients and advocates The contributors to this book show the way forward bringing a diverse range of expertise to confront these challenges Avoiding platitudes and simple dichotomies they examine what compassion in healthcare means and how it can be practised now and in the uncertain future Without Compassion There Is No Healthcare is a call to action Drawing together a decade of evidence and insight generated by a community of leading scholars and practitioners committed to promoting compassionate care it offers steady principles and practices to steer the way through times of technological change

Glass Ceilings and Ivory Towers Rachael Johnstone, Bessma Momani, 2024-05-01 Even as Canadian universities suggest their gender issues have largely been resolved many women in academia tell a different story Systemic discrimination the underrepresentation of women in more senior and lucrative roles and the belief that gender related concerns will simply self correct with greater representation add up to a serious gender problem Although these issues are widely acknowledged reliable data is elusive *Glass Ceilings and Ivory Towers* fills this research gap with a cross disciplinary data driven investigation of gender inequality in Canadian universities Research presented in this book reveals for example that women are more likely to hold sessional teaching positions and to face difficulties obtaining funding They are also poorly represented at the upper echelons of the professoriate and must contend with a gender pay gap that widens as they move up the ranks Contributors consider the daily grind of academic life social structural and systemic challenges and the gendered dynamics of university leadership all with an eye to laying the groundwork for practical and meaningful institutional change
