## **Compiling Functional Languages:**

*Compiling Functional Languages* Antoni Diller, 1988-09-08 Describes different ways of implementing functional programming languages which bear a strong family resemblance to one another and which all have their origins in the work of Turner on combinator based graph reducers First chapters cover translation of Lipskit into combinatory logic and evaluation of the resulting object code by graph reduction Later chapters follow a natural progression refining and improving the efficiency of this implementation

*Programming Language Implementation and Logic Programming* Jaan Penjam, 1994-08-24 This volume constitutes the proceedings of the 6th International Symposium on Programming Language Implementation and Logic Programming PLILP 94 held in Madrid Spain in September 1994 The volume contains 27 full research papers selected from 67 submissions as well as abstracts of full versions of 3 invited talks by renowned researchers and abstracts of 11 system demonstrations and poster presentations Among the topics covered are parallelism and concurrency implementation techniques partial evaluation synthesis and language issues constraint programming meta programming and program transformation functional logic programming and program analysis and abstract interpretation

**Modern Compiler Implementation in C** Andrew W. Appel, 2004-07-08 This new expanded textbook describes all phases of a modern compiler lexical analysis parsing abstract syntax semantic actions intermediate representations instruction selection via tree matching dataflow analysis graph coloring register allocation and runtime systems It includes good coverage of current techniques in code generation and register allocation as well as functional and object oriented languages that are missing from most books In addition more advanced chapters are now included so that it can be used as the basis for a two semester or graduate course The most accepted and successful techniques are described in a concise way rather than as an exhaustive catalog of every possible variant Detailed descriptions of the interfaces between modules of a compiler are illustrated with actual C header files The first part of the book Fundamentals of Compilation is suitable for a one semester first course in compiler design The second part Advanced Topics which includes the advanced chapters covers the compilation of object oriented and functional languages garbage collection loop optimizations SSA form loop scheduling and optimization for cache memory hierarchies

**Parallel Functional Languages and Compilers** Bolesław Szymański, 1991

**Modern Compiler Implementation in ML** Andrew W. Appel, 1998 Describes all phases of a modern compiler including techniques in code generation and register allocation for imperative functional and object oriented languages

**Compiler Construction** Uwe Kastens, Peter Pfahler, 1992-09-23 The International Workshop on Compiler Construction provides a forum for the presentation and discussion of recent developments in the area of compiler construction Its scope ranges from compilation methods and tools to implementation techniques for specific requirements of languages and target architectures This volume contains the papers selected for presentation at the 4th International Workshop on Compiler Construction CC 92 held in Paderborn Germany October 5 7 1992 The papers present recent developments on such topics as structural and

semantic analysis code generation and optimization and compilation for parallel architectures and for functional logical and application languages
