A Complete Guide to Heraldry Arthur Charles Fox-Davies, 2015-06-02 Excerpt from A Complete Guide to Heraldry Vol 1 Too frequently it is the custom to regard the study of the science of Armory as that of a subject which has passed beyond the limits of practical politics Heraldry has

been termed the shorthand of History but nevertheless the study of that shorthand has been approached too often as if it were but the study of a dead language The result has been that too much faith has been placed in the works of older writers whose dicta have been accepted as both unquestionably correct at the date they wrote and as a consequence equally binding at the present day Since the Boke of St Albans was written into the heraldic portion of which the author managed to compress an unconscionable amount of rubbish books and treatises on the subject of Armory have issued from the press in a constant succession A few of them stand a head and shoulders above the remainder The said remainder have already sunk into oblivion Such a book as Guillim must of necessity rank in the forefront of any armorial bibliography but any one seeking to judge the Armory of the present day by the standards and ethics adopted by that writer would find himself making mistake after mistake and led hopelessly astray There can be very little doubt that the Display of Heraldry is an accurate representation of the laws of Armory which governed the use of Arms at the date the book was written and it correctly puts forward the opinions which were then accepted concerning the past history of the science There are two points however which must be borne in mind The first is that the critical desire for accuracy which fortunately seems to have been the keynote of research during the nineteenth century has produced students of Armory whose investigations into facts have swept away the fables the myths and the falsehood which had collected around the ancient science and which in their preposterous assertions had earned for Armory a ridicule a contempt and a disbelief which the science itself and moreover the active practice of the science had never at any time warranted or deserved About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
