Commoning Labour and Democracy at Work Dario Azzellini, Marcelo Vieta, 2025-08-28 This book investigates the return of workers self management in recent decades as responses to recurring neoliberal crises In particular the book homes in on worker recuperated enterprises WREs a promising form of workers self organization whereby workers restart troubled bankrupt or shuttered companies as cooperatives or other forms of democratic workplace The book argues that WREs are prefigurative of new forms of work based on equality and sustainability Framed by the concepts of autogesti n the labour commons and prefigurative ethico political practices the book argues that WREs contribute to the construction of more directly democratic community economies Drawing on a range of contemporary case studies from numerous countries in the Global South and North as well as new theories of workers self management the book contributes a critical development political economic and class struggle Marxist perspective to the re emergent labour question within anti systemic social movements while theorizing the transformative nature of WREs for workers work organizations and communities Bringing a class analysis back into current discourses and debates concerning democracy at work and alternatives to global capital this book will be of interest to researchers across the fields of development studies labour studies political economy sociology of development sociology of work and political science

Democracy at Work Richard Wolff, 2012-10-02 What and who are we working for A thoughtful assessment on our current society from probably America s most prominent Marxist economist The New York Times Capitalism as a system has spawned deepening economic crisis alongside its bought and paid for political establishment Neither serves the needs of our society Whether it is secure well paid and meaningful jobs or a sustainable relationship with the natural environment that we depend on our society is not delivering the results people need and deserve One key cause for this intolerable state of affairs is the lack of genuine democracy in our economy as well as in our politics The solution requires the institution of genuine economic democracy starting with workers managing their own workplaces as the basis for a genuine political democracy Here Richard D Wolff lays out a hopeful and concrete vision of how to make that possible addressing the many people who have concluded economic inequality and politics as usual can no longer be tolerated and are looking for a concrete program of action Wolff s constructive and innovative ideas suggest new and promising foundations for much more authentic democracy and sustainable and equitable development ideas that can be implemented directly and carried forward A very valuable contribution in troubled times Noam Chomsky leading public intellectual and author of Hope and Prospects

**Human Rights at Work** Alan Bogg, Hugh Collins, ACL Davies, Virginia Mantouvalou, 2024-10-03 Should workers ever lose their job because of their political views or affiliations Should female employees be entitled to wear a headscarf in the workplace for religious reasons Can it ever be right for an employer to dismiss someone for personal activities undertaken in their leisure time What restrictions if any should be placed on the right to strike Engagingly written this innovative new textbook provides an entry point for exploring these and other topical issues

enabling students to analyse the applicability of human rights to disputes between employers and workers in the UK It offers an original perspective on the traditional topics of employment law as well as looking in greater depth at new issues such as employees use of social media or the enforcement of human rights in the gig economy Uniquely the book considers the most important international Conventions that are relevant for the law in the UK especially the European Convention on Human Rights the European Social Charter Conventions of the International Labour Organisation and the Charter of Fundamental Rights of the European Union A central question that each of the chapters addresses is whether UK employment law is compatible with human rights law Each chapter discusses all the key cases drawn from various jurisdictions including the Court of Justice of the European Union and the European Court of Human Rights Written by a stellar team of authors this textbook is an invaluable teaching aid for both postgraduate and undergraduate students studying employment law human rights human resource management and industrial relations *Fundamentals of Health at Work* C. Wilkinson,2001-02-05

*Fundamentals of Health at Work* is an engaging re assessment of workplace health with particular emphasis on the neglected issues of the social context of the working environment and the impact on individuals of their workplaces In looking at the historical context of the subject and at the concepts of health and illness a selective series of thoughts emerge linking history organizational development and health improvement This text is comprehensive and unique in its multi disciplinary analysis It explores workplace health from its theoretical foundations and draws together the themes of occupational medicine health and safety workplace health development and occupational health *Voices at Work* Alan Bogg,Tonia Novitz,2014-03 This book investigates the intersection between law and worker voice in a sample of industrialised English speaking countries namely Australia Canada New Zealand UK and USA While these countries face broadly similar regulatory dilemmas they have significant differences between their industrial systems and legal cultures *Globalization Development and Social Justice* Ann El Khoury,2015-03-27

Are there existing alternatives to corporate globalization What are the prospects for and commonalities between communities and movements such as Occupy the World Social Forum and alternative economies *Globalization Development and Social Justice* advances the proposition that another globalization is not only possible but already exists It demonstrates that there are multiple pathways towards development with social justice and argues that enabling propositional agency rather than oppositional agency such as resistance is a more effective alternative to neoliberal globalization El Khoury develops a theory of infraglobalization that emphasizes creative constitution not just contestation of global and local processes The book features case studies and examples of diverse economic practice and innovative emergent political forms from the Global South and North These case studies are located in the informal social economy and community development as well as everyday practices from prefigurative politics to community cooperatives and participatory planning This book makes an important contribution to debates about the prospects for and practices of a transformative grassroots globalization and to critical debates about globalization and development strategies It will be of

interest to students and scholars of international relations globalization social movement studies political and economic geography sociology anthropology and development studies

**Disintegrating Democracy at Work** Virginia

Doellgast,2012-02-15 The shift from manufacturing to service based economies has often been accompanied by the expansion of low wage and insecure employment Many consider the effects of this shift inevitable In *Disintegrating Democracy at Work* Virginia Doellgast contends that high pay and good working conditions are possible even for marginal service jobs This outcome however depends on strong unions and encompassing collective bargaining institutions which are necessary to give workers a voice in the decisions that affect the design of their jobs and the distribution of productivity gains Doellgast s conclusions are based on a comparative study of the changes that occurred in the organization of call center jobs in the United States and Germany following the liberalization of telecommunications markets Based on survey data and interviews with workers managers and union representatives she found that German managers more often took the high road than those in the United States investing in skills and giving employees more control over their work Doellgast traces the difference to stronger institutional supports for workplace democracy in Germany However these democratic structures were increasingly precarious as managers in both countries used outsourcing strategies to move jobs to workplaces with lower pay and weaker or no union representation Doellgast s comparative findings show the importance of policy choices in closing off these escape routes promoting broad access to good jobs in expanding service industries

**Data and Democracy at Work**

Brishen Rogers,2023-03-21 An exploration of how major companies have used advanced information technologies to limit worker power and how labor law reform could reverse that trend As our economy has shifted away from industrial production and service industries have become dominant many of the nation s largest employers are now in fields like retail food service logistics and hospitality These companies have turned to data driven surveillance technologies that operate over a vast distance enabling cheaper oversight of massive numbers of workers *Data and Democracy at Work* argues that companies often use new data driven technologies as a power resource or even a tool of class domination and that our labor laws allow them to do so Employers have established broad rights to use technology to gather data on workers and their performance to exclude others from accessing that data and to use that data to refine their managerial strategies Through these means companies have suppressed workers ability to organize and unionize thereby driving down wages and eroding working conditions Labor law today encourages employer dominance in many ways but labor law can also be reformed to become a tool for increased equity The COVID 19 pandemic and subsequent Great Resignation have indicated an increased political mobilization of the so called essential workers of the pandemic many of them service industry workers This book describes the necessary legal reforms to increase workers associational power and democratize workplace data establishing more balanced relationships between workers and employers and ensuring a brighter and more equitable future for us all
