Burke,Cary L. Cooper,2007-12-13 Organizations today are facing heightened challenges in their efforts to perform effectively These challenges are reflected in the failure of many long standing organizations and the shortened tenure of senior level executives There is increasing agreement that the unique competitive advantage organizations have today lies in their people their human resource management practices and their cultures All other elements of production can be readily obtained bought or copied We are now in the era of human capital to be successful organizations need to unleash the talents of their people Fortunately we now have considerable understanding of what high performing organizations look like However a large gap still exists between what we know and what managers actually do With contributions from a team of leading academics and practitioners Building More Effective Organizations provides an extensive survey of human resource management and the organizational practices associated with the high performance of individuals   *Quantitative Models for Performance Evaluation and Benchmarking* Joe Zhu,2013-03-09 Managers are often under great pressure to improve the performance of their organizations To improve performance one needs to constantly evaluate operations or processes related to producing products providing services and marketing and selling products Performance evaluation and benchmarking are a widely used method to identify and adopt best practices as

a means to improve performance and increase productivity and are particularly valuable when no objective or engineered standard is available to define efficient and effective performance For this reason benchmarking is often used in managing service operations because service standards benchmarks are more difficult to define than manufacturing standards Benchmarks can be established but they are somewhat limited as they work with single measurements one at a time It is difficult to evaluate an organization s performance when there are multiple inputs and outputs to the system The difficulties are further enhanced when the relationships between the inputs and the outputs are complex and involve unknown tradeoffs It is critical to show benchmarks where multiple measurements exist The current book introduces the methodology of data envelopment analysis DEA and its uses in performance evaluation and benchmarking under the context of mUltiple performance measures **Trends and Advances in Information Systems and Technologies** Álvaro Rocha,Hojjat Adeli,Luís Paulo Reis,Sandra Costanzo,2018-03-24 This book includes a selection of papers from the 2018 World Conference on Information Systems and Technologies WorldCIST 18 held in Naples Italy on March27 29 2018 WorldCIST is a global forum for researchers and practitioners to present and discuss recent results and innovations current trends professional experiences and the challenges of modern information systems and technologies research together with their technological development and applications The main topics covered are A Information and Knowledge Management B Organizational Models and Information Systems C Software and Systems Modeling D Software Systems Architectures Applications and Tools E Multimedia Systems and Applications F Computer Networks Mobility and Pervasive Systems G Intelligent and Decision Support Systems H Big Data Analytics and Applications I Human Computer Interaction J Ethics Computers K Health Informatics L Information Technologies in Education M Information Technologies in Radiocommunications N Technologies for Biomedical Applications Qualitative Research & Evaluation Methods Michael Quinn Patton,2014-10-29 Drawing on more than 40 years of experience conducting applied social science research and program evaluation author Michael Quinn Patton has crafted the most comprehensive and systematic book on qualitative research and evaluation methods inquiry frameworks and analysis options available today Now offering more balance between applied research and evaluation this Fourth Edition of Qualitative Research more than a hundred new summarizing and synthesizing exhibits and a wide range of new highlight sections sidebars that elaborate on important and emergent issues For the first time full case studies are included to illustrate extended research and evaluation examples In addition each chapter features an extended rumination written in a voice and style more emphatic and engaging than traditional textbook style about a core issue of persistent debate and controversy **Value-driven IT Management** Iain Aitken,2003 Huge sums of money are often wasted by companies on poorly aligned poorly justified and managed IT projects based on wishful thinking cost and benefit assumptions and even successful projects rarely seem to realize the benefits promised **Validity and Limitations of Fisher and Ury's best practise** Marcel Strangmueller,2018-11-15 Essay from the year 2018 in the subject Sociology Basics and General grade
