## **Between Past Future:**

Between Past and Future Hannah Arendt, 1993 Arendt's penetrating observations of the modern world based on a profound knowledge of the past constitute a major contribution to political philosophy. In this book she describes the perplexing crises which modern society faces as a result of the loss of meaning of the traditional key words of politics: justice, reason, responsibility, virtue, and glory.

**Past Futures** Ged Martin, 2004-12-15 By nature human beings seek to make sense of their past. Paradoxically, true historical explanation is ultimately impossible. Historians never have complete evidence from the past, nor is their methodology rigorous enough to prove causal links. Although it cannot be proven that A caused B, by redefining the agenda of historical discourse, scholars can locate events in time and place history once again at the heart of intellectual activity. In *Past Futures*, Ged Martin advocates examining the decisions that people take, most of which are not the result of a process but are reached intuitively. Subsequent rationalizations that constitute historical evidence simply mislead. All historians can do is to locate them in time to explain not why a decision was taken but why then. To illustrate, Martin asks a number of questions: What is a long time in history? Are we close to the past or remote from it? Is democracy a recent experiment or proof of our arrival at the end of a journey through time? Can we engage in a historical dialogue with the past without making clear our own ethical standpoints? Although explanation is ultimately impossible, humankind can make sense of its location in time through the concept of significance, a device for highlighting events and aspects of the past. In so doing, Martin suggests a radical new approach to historical discourse.

**Visions of the Future in Roman Frontier Kingdoms 100 BCE-100 CE** Richard Teverson, 2024-09-03 This is the first book-length exploration of the ways art from the edges of the Roman Empire represented the future, examining visual representations of time and the role of artwork in Roman imperial systems. This book focuses on four kingdoms from across the empire: Cottius's Alpine kingdom in the north, King Juba II's Mauretania in the south west, Herodian Judea in the east, and Kommagene to the north east. Art from the imperial frontier is rarely considered through the lens of the aesthetics of time, and Roman provincial art and the monuments of allied rulers are typically interpreted as evidence of the interaction between Roman and local identities. In this interdisciplinary study, which explores statues, wall paintings, coins, monuments, and inscriptions, readers learn that these artworks served as something more: they were created to represent the futures that allied rulers and their people foresaw. The pressure of Roman imperialism drove patrons and artists on the empire's borders to imbue their creations with increasingly sophisticated ideas about the future as they wrestled with consequential decisions made under periods of intense political pressure. Comprehensively illustrated and providing an important new approach to Roman material culture at the edge of empire, *Visions of the Future in Roman Frontier Kingdoms 100 BCE-100 CE* is suitable for students and scholars working on Rome and its frontiers, as well as Roman material culture more broadly, and those studying the aesthetics of time in art and art history.

*Yoga: The Supreme Science* Osho, 2009 Drawing on the teachings of Patanjali, Osho gives an entirely new

perspective on the fundamental questions of life the nature of heaven religion and God For Osho it is not a question of being good or bad or of a God in the sky but of each individual becoming aware of his being and attaining kaivalya the ultimate state of enlightenment when the meditator goes beyond all desire This process draws on the inner science of yoga

*Modernism* Ástráður Eysteinnsson, Vivian Liska, 2007 The two volume work *Modernism* has been awarded the prestigious 2008 MSA Book Prize *Modernism* has constituted one of the most prominent fields of literary studies for decades While it was perhaps temporarily overshadowed by postmodernism recent years have seen a resurgence of interest in modernism on both sides of the Atlantic These volumes respond to a need for a collective and multifarious view of literary modernism in various genres locations and languages Asking and responding to a wealth of theoretical aesthetic and historical questions 65 scholars from several countries test the usefulness of the concept of modernism as they probe a variety of contexts from individual texts to national literatures from specific critical issues to broad cross cultural concerns While the chief emphasis of these volumes is on literary modernism literature is seen as entering into diverse cultural and social contexts These range from inter art conjunctions to philosophical environmental urban and political domains including issues of race and space gender and fashion popular culture and trauma science and exile all of which have an urgent bearing on the poetics of modernity

*The Black Swan: Second Edition* Nassim Nicholas Taleb, 2010-05-11 The most influential book of the past seventy five years a groundbreaking exploration of everything we know about what we don't know now with a new section called *On Robustness and Fragility* A black swan is a highly improbable event with three principal characteristics It is unpredictable it carries a massive impact and after the fact we concoct an explanation that makes it appear less random and more predictable than it was The astonishing success of Google was a black swan so was 9 11 For Nassim Nicholas Taleb black swans underlie almost everything about our world from the rise of religions to events in our own personal lives Why do we not acknowledge the phenomenon of black swans until after they occur Part of the answer according to Taleb is that humans are hardwired to learn specifics when they should be focused on generalities We concentrate on things we already know and time and time again fail to take into consideration what we don't know We are therefore unable to truly estimate opportunities too vulnerable to the impulse to simplify narrate and categorize and not open enough to rewarding those who can imagine the impossible For years Taleb has studied how we fool ourselves into thinking we know more than we actually do We restrict our thinking to the irrelevant and inconsequential while large events continue to surprise us and shape our world In this revelatory book Taleb will change the way you look at the world and this second edition features a new philosophical and empirical essay *On Robustness and Fragility* which offers tools to navigate and exploit a Black Swan world Taleb is a vastly entertaining writer with wit irreverence and unusual stories to tell He has a polymathic command of subjects ranging from cognitive science to business to probability theory Elegant startling and universal in its applications *The Black Swan* is a landmark book itself a black swan
