operating cash flows The main difference is that only the direct method shows the actual operating cash flows such as collections from customers and payments to suppliers The indirect method uses the reconciliation as its operating activities section that is why it is also called reconciliation method When describing the content or giving examples of the statement the indirect method is used always in this paper In spite of the fact that after SFAS No 95 the Financial Accounting Standards Board FASB is preferring the direct method most companies are using the indirect method This is because in most cases companies do not store all relevant data in their information system to use the direct method In the other two sections investing and financing activities the direct method must be used 6 In the second part this work will give an overview and is showing details of form and content of the statement of cash flows according to the SFAS No 95 as well as it is presenting information about how to prepare the statement
