Geraci, 2014-06-13 Millions of users have taken up residence in virtual worlds and in those worlds they find opportunities to revisit and rewrite their religious lives Robert M Geraci argues that virtual worlds and video games have become a locus for the satisfaction of religious needs providing many users with devoted communities opportunities for ethical reflection a meaningful experience of history and human activity and a sense of transcendence Using interviews surveys and his own first hand experience within the virtual worlds Geraci shows how World of Warcraft and Second Life provide participants with the opportunity to rethink what it means to be religious in the contemporary world Not all participants use virtual worlds for religious purposes but many online residents use them to rearrange or replace religious practice as designers and users collaborate in the production of a new spiritual marketplace Using World of Warcraft and Second Life as case studies this book shows that many residents now use virtual worlds to re imagine their traditions and work to restore them to authentic sanctity or else replace religious institutions with virtual communities that provide meaning and purpose to human life For some online residents virtual worlds are even keys to a post human future where technology can help us transcend mortal life Geraci argues that World of Warcraft and Second Life are virtually sacred because they do religious work They often do such work without regard for and frequently in conflict with traditional religious institutions and practices ultimately they participate in our sacred landscape as outsiders competitors and collaborators

Apocalyptic AI Robert M. Geraci, 2010-03-05 Apocalyptic AI the hope that we might one day upload our minds into machines or cyberspace and live forever is a surprisingly wide spread and influential idea affecting everything from the world view of online gamers to government research funding and philosophical thought In Apocalyptic AI Robert Geraci offers the first serious account of this cyber theology and the people who promote it Drawing on interviews with roboticists and AI researchers and with devotees of the online game Second Life among others Geraci illuminates the ideas of such advocates of Apocalyptic AI as Hans Moravec and Ray Kurzweil He reveals that the rhetoric of Apocalyptic AI is strikingly similar to that of the apocalyptic traditions of Judaism and Christianity In both systems the believer is trapped in a dualistic universe and expects a resolution in which he or she will be translated to a transcendent new world and live forever in a glorified new body Equally important Geraci shows how this worldview shapes our culture Apocalyptic AI has become a powerful force in modern culture In this superb volume he shines a light on this belief system revealing what it is and how it is changing society
