American automotive journals **Motor Sport** William Boddy,1972 **Formula One** Brian Harvey,2020-02-12 Filling the many gaps in Formula 1 records this book re writes the racing history books The history of F1 can be neatly divided into two eras the first formally ending January 1980 when the terms Grand Prix and World Championship became synonymous although there would be three more non championship races after that date However up to January 1973 OVER HALF of F1 races were NOT included in the Championship results for the spurious reason that each country should have just a single F1 race The classification of many F1 races as non Championship did a disservice to the achievements of drivers of the Fangio Moss Clark and Stewart era and even more so to the four pre Championship years which began in 1946 When today a commentator says Rosberg s 16th win equals the F1 wins of Stirling Moss this is manifestly untrue If the same drivers in the same F1 cars compete at the same tracks and over a similar distance then each race deserves to have its place in the records as a Championship quality event This book includes such races alongside contemporary Championship races and combined with known figures since 1980 produces what can surely be accepted as The Real Score of Formula 1 **Cosworth** Graham Robson,2017-05-15 Not only has Cosworth designed and supplied many race car engines which won F1 CART and many other Championship races but it has also produced many celebrated high performance road car engines In more recent times its growing expertise in developing electronic data capture components and in providing ultra high tech engine manufacturing facilities have made it a world leader at many levels The expansion continues and in this book the Cosworth story has been brought up to the minute to celebrate the 50th anniversary of the birth of the legendary DFV F1 engine
