The Faerie Queene and Middle English Romance Andrew King,2000 In this study of the impact of Middle English romance on *The Faerie Queene* this text employs the concept of memory in which Middle English romance writers and Spenser show interest to build a sense of the complexity of the native romance tradition **Sir Bevis of Hampton in**

The Romance of William and the Werewolf Michael Smith, 2024-12-05 A magical long forgotten masterpiece The Romance of William and the Werewolf is the story of two princes who overcame their wicked family to reclaim their inheritance and build a society based on tolerance and equality Originally titled William of Palerne it was first translated from French and then converted into an alliterative Middle English romance by an obscure Gloucestershire scribe in c 1350 It has never been translated into modern English until now Written over 600 years ago it is a multi layered tale of poverty justice exile and otherness its themes of inheritance the freedom of women fairness and forgiveness familial responsibility and social class speak to us just as clearly today and challenge us to reflect upon our class driven politics and the corruption entitlement and indifference which underlie it As with Michael Smith's other translations Sir Gawain and the Green Knight and King Arthur's Death The Romance of William and the Werewolf will feature a detailed historical introduction a comprehensive glossary and notes and Michael's own rich and beautiful linocut illustrations

Radulescu, Cory Rushton, 2009 Popular romance was one of the most wide spread forms of literature in the Middle Ages yet despite its cultural centrality and its fundamental importance for later literary developments the genre has defied precise definition its subject matter ranging from tales of chivalric adventure to saintly women and monsters that become human The essays in this collection provide contexts definitions and explanations for the genre particularly in an English context Topics covered include genre and literary classification race and ethnicity gender orality and performance the romance and young readers metre and form printing culture and reception

the field of Old Norse and draws together philological literary historical and anthropological perspectives on the subject

Parergon, 1995 **The Theory and Practice of Revolt in Medieval England** Claire Valente, 2003

Medieval Englishmen were treacherous rebellious and killed their kings as their French contemporaries repeatedly noted In the thirteenth through fifteenth centuries ten kings faced serious rebellion in which eight were captured deposed and or murdered One other king escaped open revolt but encountered vigorous resistance In this book Professor Valente argues that the crises of the thirteenth and fourteenth centuries were crucibles for change and their examination helps us to understand medieval political culture in general and key developments in later medieval England in particular The Theory and Practice of Revolt takes a comparative look at these crises seeking to understand medieval ideas of proper kingship and government the role of political violence and the changing nature of reform initiatives and the rebellions to which they led It argues that rebellion was an accepted and to a certain extent legitimate means to restore good kingship throughout the period but that over time it became increasingly divorced from reform aims which were satisfied by other means and transformed by growing lordly dominance arrogance and selfishness Eventually the tradition of legitimate revolt disappeared to be replaced by both parliament and dynastic civil war Thus on the one hand development of parliament itself an outgrowth of political crises reduced the need for and legitimacy of crisis reform On the other hand when crises did arise the idea and practice of the community of the realm so vibrant in the thirteenth century broke down under the pressures of new political and socio economic realities By exploring violence and ideas of government over a longer period than is normally the case this work attempts to understand medieval conceptions on their own terms rather than with regard to modern assumptions and to use comparison as a means of explaining events ideas and developments **Sir Bevis of Hampton** Jennifer

Fellows, 2017 Sir Bevis of Hampton is arguably one of the most important non Arthurian romances in Middle English but it is only comparatively recently that it has received much scholarly or critical attention Originating in England the story of Bevis was immensely popular and influential during the late medieval and early modern periods both in the British Isles and in continental Europe The Middle English Bevis was translated around 1300 from an Anglo Norman original which spawned versions both written and oral in a dozen or so languages these range in date from the beginning of the fourteenth century to within living memory when a version of the story was still being performed by Sicilian puppeteers The printing history of Bevis as well as references to the romance in the works of such writers as Shakespeare Spenser Bunyan Drayton and Steele indicates that it was still being widely read in English until well into the early modern period This parallel text edition is designed to complement rather than to supplant earlier editions of Bevis such as that produced by Eugen Kolbing and published for the Early English Text Society in 1885 1894 A substantial introduction and extensive annotation place the Middle English romance in its literary and cultural contexts from the fourteenth century down to the present day The principal aims of the edition are to indicate the variety and complexity of the textual tradition of Bevis and to provide

material for further more nuanced approaches to a significant cultural phenomenon Medieval Rhetoric Scott D. Troyan, 2004 A formidable challenge to the study of Roma Gypsy music is the muddle of fact and fiction in determining identity This book investigates Gypsy music as a marked and marketable exotic substance and as a site of active cultural negotiation and appropriation between the real Roma and the idealized Gypsies of the Western imagination David Malvinni studies specific composers including Liszt Brahms Rachmaninov Janacek and Bartok whose work takes up contested and varied configurations of Gypsy music The music of these composers is considered alongside contemporary debates over popular music and film as Malvinni argues that Gypsiness remains impervious to empirical revelations about the real Roma

Studies in Medievalism, 2001 *Magic in Medieval Romance* Michelle Sweeney, 2000 This book examines the roles of magic in medieval romance Magic's crucial function in the romances may be established by studying the diverse works of Chrétien de Troyes the Lais of Marie de France the romances of Sir Tristrem Syr Launfal Yvain Gawain and Chaucer's The Franklin's Tale Romance authors used magical trials to explore a character's moral status and position on issues important to the community such as when to maintain loyalty to a king or to a lover Romance authors were able to encourage the exploration of human motivation by using magic to create or expose a character's morally ambiguous situation This technique enabled a broader discussion of social issues than would have been allowed in situations constrained by the boundaries of Christian dogmatism In order to understand the function of magic in medieval romance it is necessary to appreciate its function in the medieval world Magic is coupled to some of the most important works of the medieval age such as the theological texts of Augustine and Aquinas the histories of Geoffrey of Monmouth and Wace as well as playing a significant role in medicine and the nascent studies of science Romance writers capitalised upon the associations between magic and these fields of study to create a more serious framework for their texts The romances could then operate beyond the level of simple entertainment and provide the interested audience with social commentary moral analysis and material for thought on a wide variety of issues

Reinventing the Middle Ages & the Renaissance William F. Gentrup, 1998 The fourteen essays presented in this volume contribute substantially to the study of the reinvention of the Middle Ages and the Renaissance They take an historicized approach to constructions of the past and most address the relatively new field of Medievalism All of them focus on how and why the present of any period uses the past to promote its own opinions beliefs doctrines or views In particular the volume demonstrates that reinventions of past eras or figures can be motivated by a nationalistic desire to create cultural roots to discover origins that justify a regime or group's self identity to appropriate a cultural icon or neglected author for a particular political agenda or to reflect on contemporary social issues via a remote time and place Reworkings or adaptations of earlier culture often tell us more about the age in which they were produced than the one revived or revisited This volume features five essays that treat medieval subjects four focus on Tudor and Stuart figures religion or politics and five concentrate on nineteenth century uses of medieval or early modern events literary conventions
