Country Architecture:

The Architecture of Country Houses Andrew J. Downing, 2013-01-17 Throughout the early Victorian period American domestic architecture was dominated by the ideas and designs of Andrew Jackson Downing 1815-52 Downing who was America's first important landscape architect was instrumental in establishing a well-styled, efficient yet low-priced house that offered many features that previously only mansions could provide. His designs were widely spread both by his books and by periodical republication. Downing's most important work was his *Architecture of Country Houses* 1850 which passed through nine editions by 1866 and served as the stylebook for tens, perhaps hundreds of thousands of homes throughout the Eastern United States. It contains 34 designs for model homes: country house in this context simply meaning a separate house as opposed to a town house with elevations, floor plans, and discussion of design, construction, and function. The English country house of the period is the ground style upon which other styles are overlaid: designs showing Gothic, French, Italian, and Elizabethan styles allow the user considerable choice. In many ways, these designs form one of the first steps toward the modern house with a vowed emphasis on function and convenience, expression of personality, catholicism of taste, and concord with environment. Decoration of course was not frowned upon. Most valuable today is the author's full, thorough discussion of many other aspects of the early Victorian house: aesthetic concerns, of architecture, adjustment to locality, materials, construction costs, floor plan, roofing, shingling, painting, chimneys, and fireplaces, interior, woodwork, wallpapering, decoration, furnishing, ventilation, sanitation, central heating, and landscaping. Since most of the houses concerned have been destroyed or altered and practically no living situations have been preserved, this book is indispensable to everyone interested in early American culture, interior decoration, restoration, or Victorian architecture. It is far and away the richest source for the period.

American Country Building Design Donald J. Berg, 2005 Provides an excellent introduction as well as suggestions for using these plans to add architectural detail to your own home, an excellent bibliography. *Victorian Homes: The best home, barn, and landscape designs in a charming book.* It contains numerous original illustrations showing a wealth of construction details, site plans, and plantings. *Fine Homebuilding* This classic bestseller contains the finest collection of architectural designs from a bygone era and it's a boon for anyone hoping to construct that dream house or add charming touches to a modern one. Hundreds of illustrations from actual 19th-century building plans feature architects' blueprints and drawings, full-color photos, and more. The buildings range from humble farmers' cabins to summer getaway cottages for the rich, and there's plenty of detail work including built-in shelves, dormers, and turned balusters. With this information, an architect could easily create anything shown on the pages.
