Digital Literacy Susan Wiesinger, Ralph Believeau, 2023

The second edition of Digital Literacy provides a highly focused exploration of key critical concepts in understanding digital media in a clear engaging and accessible way for an introductory audience. Core to the book's approach is its comparison of digital literacy perspectives across different cultures, highlighting the significant disparity in digital privacy and regulation of technology companies across countries to expand on the discourse surrounding modern digital engagement. Prescient issues are examined in depth such as the decline of traditional media, the rise of Big Tech, and the erosion of privacy and democratic ideals. Important themes explored in chapters across the book include digital identity, the internet as infrastructure, the web as a collaborative tool, and domestic and global digital divides. The new edition also explores digital literacy and the pandemic as well as the growing body of research around the effects and impact of the digital technologies we use every day. There are also useful Applied Skills Appendices outlining core areas of digital practice. The text is an ideal resource for students and scholars of mass communication, media literacy, digital information literacy, and digital technology courses, as well as for all those wanting to know more about the deep, on-going impact of communication technologies on our lives. **Libraries**

Empowering Society through Digital Literacy Heather Todd, Prudence W. Dalrymple, Luisa Marquardt, Ning Zou, 2025-11-03. High-speed connectivity, massive growth in social media, the ubiquity of mobile devices, and the emergence of artificial intelligence have led to information confusion, chaos, and complexity. The ability for everyone to create, find, evaluate, use, and apply information effectively is critical to successful personal, societal, and global outcomes. Libraries and librarians must adapt their services and instructional approaches to engage with digital natives, immigrants, and refugees to ensure all gain the competencies required by digital citizens. What constitutes digital literacy, and how can we do it better? This book explores concepts, frameworks, and practices in digital literacy to foster adoption of initiatives to extend digital literacy to all.

Strategies Of Digitalization And Sustainability In Agrifood Value Chains Isabelle Piot-Lepetit, Fatima El

Hadad-Gauthier, 2025-03-04. Nowadays, stakeholders of agrifood value chains are developing specific strategies regarding their sustainable transformations supported by digital technologies. These strategies are designing new activities within and outside the whole value chains and in each of their specific segments such as raw products, supplies, and machinery production, transformation, transportation, and logistics, distribution, retail, and consumption. The strategies developed by agrifood stakeholders related to the digitalization for more sustainability of their practices and activities are changing the way stakeholders are interacting and fuel, in one way or another, new reconfigurations of value chains. Most often, sustainability initiatives explore new value-added activities, goods, and services, while digital initiatives acknowledge the opportunities resulting from the use of digital solutions such as sensors, the Internet of Things, e-commerce platforms, blockchain, or robots, and advanced data analytics based on big data, cloud computing technologies, or artificial intelligence applications. Digital and sustainable transformations have been explored in the literature for some time now by considering either the changes involved in farms, companies, and business activities or the necessary adjustments of the economic and

regulatory environments However the setting up of strategies related to the digitalization for sustainable agrifood value chains has not often been investigated
