Digital and Image Geometry Gilles Bertrand, Atsushi Imiya, Reinhard Klette, 2002-01-16 Images or discrete objects to be analyzed based on digital image data need to be represented analyzed transformed recovered etc These problems have stimulated many interesting developments in theoretical foundations of image processing This coherent anthology presents 27 state of the art surveys and research papers on digital image geometry and topology It is based on a winter school held at Dagstuhl Castle Germany in December 2000 and offers topical sections on topology representation geometry multigrid convergence and shape similarity and simplification

Digital and Image Geometry Gilles Bertrand, Atsushi Imiya, Reinhard Klette, 2014-03-12 Images or discrete objects to be analyzed based on digital image data need to be represented analyzed transformed recovered etc These problems have stimulated many interesting developments in theoretical foundations of image processing This coherent anthology presents 27 state of the art surveys and research papers on digital image geometry and topology It is based on a winter school held at Dagstuhl Castle Germany in December 2000 and offers topical sections on topology representation geometry multigrid convergence and shape similarity and simplification

Fundamentals of Three-dimensional Digital Image Processing Junichiro Toriwaki, Hiroyuki Yoshida, 2009-04-23 This book is a detailed description of the basics of three dimensional digital image processing A 3D digital image abbreviated as 3D image below is a digitalized representation of a 3D object or an entire 3D space stored in a computer as a 3D array Whereas normal digital image processing is concerned with screens that are a collection of square shapes called pixels and their corresponding density levels the image plane in three dimensions is represented by a division into cubical graphical elements called voxels that represent corresponding density levels In the context of image processing in many cases 3D image processing will refer to the input of multiple 2D images and performing processing in order to understand the 3D space or scene that they depict This is a result of research into how to use input from image sensors such as television cameras as a basis for learning about a 3D scene thereby replicating the sense of vision for humans or intelligent robots and this has been the central problem in image processing research since the 1970s However a completely different type of image with its own new problems the 3D digital image discussed in this book rapidly took prominence in the 1980s particularly in the field of medical imaging These were recordings of human bodies obtained through computed or computerized tomography CT images that recorded not only the external visible surface of the subject but also to some degree of resolution its internal structure This was a type of image that no one had experienced before

Advances in Multimedia Information Processing - PCM 2006 Yueting Zhuang, Shiqiang Yang, Yong Rui, Qinming He, 2006-10-25 This book constitutes the refereed proceedings of the 7th Pacific Rim Conference on Multimedia PCM 2006 held in Hangzhou China in November 2006 The 116 revised papers presented cover a wide range of topics including all aspects of multimedia both technical and artistic perspectives and both theoretical and practical issues

Encyclopedia of Computer Science and Technology Phillip A.

Laplante,2017-10-02 With breadth and depth of coverage the Encyclopedia of Computer Science and Technology Second Edition has a multi disciplinary scope drawing together comprehensive coverage of the inter related aspects of computer science and technology The topics covered in this encyclopedia include General and reference Hardware Computer systems organization Networks Software and its engineering Theory of computation Mathematics of computing Information systems Security and privacy Human centered computing Computing methodologies Applied computing Professional issues Leading figures in the history of computer science The encyclopedia is structured according to the ACM Computing Classification System CCS first published in 1988 but subsequently revised in 2012 This classification system is the most comprehensive and is considered the de facto ontological framework for the computing field The encyclopedia brings together the information and historical context that students practicing professionals researchers and academicians need to have a strong and solid foundation in all aspects of computer science and technology

Geometric Properties for Incomplete Data Reinhard Klette,Ryszard Kozera,Lyle Noakes,Joachim Weickert,2006-03-14 Computer vision and image analysis require interdisciplinary collaboration between mathematics and engineering This book addresses the area of high accuracy measurements of length curvature motion parameters and other geometrical quantities from acquired image data It is a common problem that these measurements are incomplete or noisy such that considerable efforts are necessary to regularise the data to fill in missing information and to judge the accuracy and reliability of these results This monograph brings together contributions from researchers in computer vision engineering and mathematics who are working in this area The book can be read both by specialists and graduate students in computer science electrical engineering or mathematics who take an interest in data evaluations by approximation or interpolation in particular data obtained in an image analysis context
