Biology Aaron Franklin Shull, George Roger Larue, Alexander Grant Ruthven, 1920 Zoology is the science of animals This was the definition centuries ago when zoology was almost exclusively the classification and naming of animals Since that time there has arisen a vast body of doctrine concerning modes of life life processes inter relations of animals development distribution and descent most of which has little bearing on classification which is now founded upon principles as basic as those underlying other branches of science For the purposes of this volume anything that has to do with animals is part of zoology This book is in practice one long definition of zoology It includes morphology physiology ecology zoogeography paleontology taxonomy and evolution as part of the zoological sciences This book being a general discussion will contain elementary facts and principles from each of these branches of science Students should find it a useful exercise to stop and reflect which of the divisions of zoology are at any given moment actually being studied
