giants increasingly dominate the digital playing field economies are rapidly changing from traditional to digital and cybercrime is given free rein Digitalization also offers excellent opportunities to achieve the necessary global changes and improvements in numerous areas such as migration climate good education and good healthcare for all After extensive analysis of what is changing as a result of digitalization this book takes an in depth look at possible new forms of governance in the digital world Europe has been taken as the starting point First of all because the author is most familiar with the state of the art in Europe but also because Europe has already been taking a number of important initiatives in the field of digital legislation Nevertheless Europe is in many ways still very much behind large countries such as the US and China This book makes numerous suggestions to strengthen the European digital position in the years to come This is badly needed for the future prosperity of Europeans and for Europe s position in the world
