Character Through Creative Experience William Clayton Bower, 1930 **Logos and Life: Creative Experience and the Critique of Reason** Anna-Teresa Tymieniecka, 2012-12-06 It is rare that we feel ourselves to be participating in history Yet as Bertrand Russell observed philosophy develops in response to the challenges of socio cultural problems and situations The present day philosophical endeavor is prompted not by one or two but by a conundrum of problems and controversies in which the forces carrying life are set against each other The struggles in which contemporary mankind is fiercely engaged are not confined as in the past to economic territorial or religious rivalries nor to the quest for power but extend to the primary conditions of human existence They undermine man's primordial confidence in life and shatter the intimacy of his home on earth Philosophical reflection today cannot fail to feel the pressure of the current situation within which it unfolds Since this situation now involves the ultimate conditions of human existence its demands have at last given to philosophy the impetus and direction needed for conceiving that the first and last of its concerns should be life itself Affect, Creative Experience, And Psychological Adjustment Sandra W. Russ, 2015-11-17 Previously neglected more and more affect and creativity is recognized as an area that is important and exciting area to investigate This book presents the very latest ideas and research by leaders in the field about the role of affect in the creative process Affect Creative Experience and Psychological Adjustment is an arena where new theories and concepts can be presented research findings compared and discussed methodological issues debated and future research outlined Key questions in affect and creativity focus on identifying specific affective processes that are most important in creativity discovering the underlying mechanisms that account for the relationships between affect and creativity exploring differential effects of various types of affect such as positive and negative affect on creativity and understanding how these things relate to psychological adjustment As with any new line of research investigation there is a fermenting of ideas speculations research findings hunches methodological issues and tests of theoretical models that evolves into a clear vision of heuristic theoretical models and identification of the most important research questions This book contributes to that process in the area of affect and creativity Creative Experience Mary Parker Follett, 1924 **Association Men** ,1930 *Creative Impulse in Industry* Helen Marot, 1918
