[Crime and Law in England, 1750-1840](#) Peter King, 2006-12-07 How was law made in England in the eighteenth and early nineteenth centuries Through detailed studies of what the courts actually did Peter King argues that parliament and the Westminster courts played a less important role in the process of law making than is usually assumed Justice was often remade from the margins by magistrates judges and others at the local level His book also focuses on four specific themes gender youth violent crime and the attack on customary rights In doing so it highlights a variety of important changes the relatively lenient treatment meted out to women by the late eighteenth century the early development of the juvenile reformatory in England before 1825 i e before similar changes on the continent or in America and the growing intolerance of the courts towards everyday violence This study is invaluable reading to anyone interested in British political and legal history

**The Cambridge Social History of Britain, 1750-1950** F. M. L. Thompson, 1990 Whilst in certain quarters it may be fashionable to suppose that there is no such thing as society historians they have had no difficulty in finding their subject The difficulty rather is that an outpouring of research and writing is hard for anyone but the specialist to keep up with the literature or grasp the overall picture In these three volumes as is the tradition in Cambridge Histories a team of specialists has assembled the jigsaw of topical monographic research and presented an interpretation of the development of modern British society since 1750 from three perspectives those of regional communities the working and living environment and social institutions Each volume is self contained and each contribution thematically defined contains its own chronology of the period under review Taken as a whole they offer an authoritative and comprehensive view of the manner and method of the shaping of society in the two centuries of unprecedented demographic and economic change

**British Economic and Social History** R. C. Richardson, William Henry Chaloner, 1996

The Civilization of Crime Eric Arthur Johnson, Eric H. Monkkonen, 1996 Along with most of the rest of Western culture has crime itself become more civilized This book exposes as myths the beliefs that society has become more violent than it has been in the past and that violence is more likely to occur in cities than in rural areas The product of years of study by scholars from North America and Europe The Civilization of Crime shows that however violent some large cities may be now both rural and urban communities in Sweden Holland England and other countries were far more violent during the late Middle Ages than any cities are today Contributors show that the dramatic change is due in part to the fact that violence was often tolerated or even accepted as a form of dispute settlement in village dominated premodern society Interpersonal violence declined in the seventeenth and eighteenth centuries as dispute resolution was taken over by courts and other state institutions and the church became increasingly intolerant of it The book also challenges a number of other historical sociological theories among them that contemporary organized crime is new and addresses continuing debate about the meaning and usefulness of crime statistics
