discussion began four years ago about launching the American Association for the Study of Mental Imagery there was still a

great deal of skepticism on the part of many academic and clinical psychologists They held to the gradually diminishing view

that mental imagery was too idiosyncratic a subject for intensive study However there were sufficient visionaries to

recognize the undeniable importance of imagery for the functioning of life in memory and the transmission of information

Through the valiant efforts of these pioneers in psychology art and movement therapy and others in the field of human

ubiquitous nature of imagery and its impact on life The third annual meeting of AASMI was held in 1981 at Yale University
