The Structure of Criminal Procedure Barton L. Ingraham, 1987-05-21 A model is developed for analyzing criminal procedure across nations and cultures and applied to the U S France the U S S R and China The model envisions common functions of arrest and detention screening charging and defending trial sanctioning and appeal The comparison reveals significant differences between inquisitorial and adversarial systems including the extent of court authority to control other criminal justice agencies the defendant s role in the proceedings and the court s role in the proceedings Differences between noncommunist and communist inquisitorial systems involve personnel who perform each function degrees of public participation and the educative rehabilitative function of the criminal justice process Criminal Justice Abstracts The Structure of Criminal Procedure presents for the first time ever a detailed comparison of the criminal procedures of four major nations France the United States China and the Soviet Union In addition the author also develops his theory on the Morphology of Criminal Procedure which hypothesizes that there is a common structure in every modern procedural system no matter how different it may appear on the surface He stresses six basic functions inherent in all systems arrest and trial detention screening charging and defending trial sanctioning and appeal and he successively analyzes each of them in depth Practical ways to apply his model are provided along with encouragement for others to engage in new comparative studies or studies of individual systems in order to clarify the ways in which the practical demands of society the legal profession and legal institutions interact with the functional needs of the system to produce new ways of procedure or new ways of using old procedures

Criminal Procedure Investigation and Right to Counsel is for courses on criminal procedure law that focus on the issues pertaining to the investigation of criminal activities It is a spin off of Comprehensive Criminal Procedure by the same team of authors which covers both the investigatory and adjudicatory aspects of criminal procedure law The casebook focuses primarily on constitutional criminal procedure law but also covers relevant statutes and court rules It explores not only the contemporary state of the law but also its historical and theoretical foundations It incorporates a particular emphasis on

empirical knowledge about the real world impacts of law in action the significance of race and class the close relationship between criminal procedure law and substantive criminal law the cold reality that hard choices sometimes must be made in a world of limited criminal justice resources and finally the recognition that criminal procedure law always should strive to achieve both fairness to the accused and justice for society as a whole

New to the Third Edition We have added a wonderful new co author Yale Professor Tracey Meares whose special expertise in the law and policy of police investigations has enriched the casebook tremendously The Introduction chapter has been updated with a number of new scholarly writings that provide an overview of important aspects of criminal procedure law The Right to Counsel chapter incorporates the new wave of structural reform litigation over the often crushing caseloads and frequently inadequate resources of public defender offices the chapter has also been completely reorganized for clarity and ease of teaching The chapter on *Boyd v United States* has been revised in light of the recent apparent revival of at least some aspects of that decision and its newfound relevance to contemporary criminal procedure law The Fourth and Fifth Amendment chapters together with the chapter on Complex Investigations have been completely rewritten to reflect the latest legal social and empirical developments in such important areas as police discretion and data searches
