Women and Religiosity in Orthodox Christianity Ina Merdjanova, 2021-11-02 Women and Religiosity in Orthodox Christianity fills a significant gap in the sociology of religious practice Studies focused on women s religiosity have overlooked Orthodox populations while studies of Orthodox practice operating within the dominant theological historical and sociological framework have remained gender blind The essays in this collection shed new light on the women who make up a considerable majority of the Orthodox population by engaging women s lifeworlds practices and experiences in relation to their religion in multiple varied localities discussing both contemporary and pre 1989 developments These contributions critically engage the pluralist and changing character of Orthodox institutional and social life by using feminist epistemologies and drawing on original ethnographic research to account for Orthodox women s previously ignored perspectives knowledges and experiences Combining the depth of ethnographic analysis with geographical breadth and employing a variety of research methodologies this book expands our understanding of Orthodox Christianity by examining Orthodox women of diverse backgrounds in different settings parishes monasteries and the secular spaces of everyday life and under shifting historical conditions and political regimes In defiance of claims that Orthodox Christianity is immutable

and fixed in time these essays argue that continuity and transformation can be found harmoniously in social practices demographic trends and larger material contexts at the intersection between gender Orthodoxy and locality Contributors Kristin Aune Milica Bakic Hayden Maria Bucur Ketevan Gurchiani James Kapal Helena Kupari Ina Merdjanova Sarah Riccardi Swartz Eleni Sotiriou Tatiana Tiaynen Qadir Detelina Tocheva

Moving beyond Theoria toward Theosis Justin A. Davis, 2024-06-10 Moving Beyond Theoria Towards Theosis focuses on the telos of man as understood in Plato's theoria envisioned in the allegory of the cave and early Christian reinterpretation of theoria as theosis In his famed allegory of the cave Plato maintains that real life exists beyond our base perceptions of reality and is found in the realm of ideas Theoria is eternal rest in this realm and is understood as the telos of mankind Plato's theoria underwent change as it was reinterpreted under middle Platonic and neo Platonic thought These systems incorporated a more mature idea of the divine than Plato but still minimized the material world This book explores how early Christianity inherited Plato's cosmology and terminology Theoria was also reinterpreted within the Christian context Eventually the term was abandoned for theosis Theosis is beyond theoria as it includes contemplation of the forms as well as union with the source of the forms and the affirmation of the material realm In this volume Justin A Davis shows how the Orthodox use of icons can be key to understanding theosis The icon is a material object that connects to a higher reality and ultimately toward union with the divine Plato's cosmology is collapsed and transfigured in union with the uncreated energy of God Icons are the depiction of spiritual ascesis and the new telos of man theosis
