 Young,2011-06-24 This book sets forth a new model of development from a causal perspective As this is an area vital to
 several disciplines It has been written at multiple levels and for multiple audiences It is based on the work of Piaget and Neo
 Piagetians but also covers other major models in development It has elements that make it attractive as a teaching text but it
 is especially research focused It has clinical applications It presents many new ideas and models consistent with the existing
 literature which is reviewed extensively Students researchers and practitioners should find it useful The models presented in
 the present work build on models introduced in prior publications e g Young 1990a 1990b 1997 Listening in Language
 Learning Michael Rost,C N Candlin,2014-06-17 Examines listening as both a means of achieving understanding and as a
 teachable skill The underlying theme of the volume is that an integration of cognitive social and educational perspectives is
 necessary in order to characterise effectively what listening ability is and how it may develop It introduces listening from a
 cognitive perspective and presents a detailed investigation of listening in social and educational contexts The study
 concludes with an analysis of how listening development can be incorporated effectively into curriculum design **Multiple

 continue and change the discourse topic in expository writing Discourse topic is examined by focusing on the sequential
 techniques and strategies in a step by step process To describe the process a model of sequentiality is proposed The aims of
 the book are to advance current thinking in discourse analysis and to provide a practical exemplar of expository discourse

 universities is exercised the advancing and testing of ideas the production of truth and knowledge an activity that is nothing

less than the the essential sound for a place of thought But as ideas advance and are tested what are people doing What is the role for emotions and relationships What worries do faculty and graduate students bring to this occasion What problems do participants face as they talk with each other How are problems made visible in talk and given attention through talk Colloquium speaks to these questions by analyzing tape recorded discussions of several academic groups and interviews in which academics reflect about their colloquium participation Colloquium addresses three key questions 1 What are the communicative problems that face graduate student and faculty participants 2 What conversational strategies are used in response to these problems and 3 How ought academics talk with each other This book develops how the academic colloquium is best conceived as a dilemmatic situation a communicative occasion involving tensions and contradiction With a dilemmatic perspective colloquium problems experienced as diffuse and hard to articulate become recognizable various conversational trivia become sensible and specific moral practical proposals emerge as defensible and desirable courses of action The work covers views that colloquium problems from the perspective of individual participants in their roles as presenters and discussants and graduate students and faculty members dilemmas discourse practices of the academic colloquium are examined from a group perspective and a philosophical and pragmatic reconstruction of practice
