Deviant Sexual Behaviour John Bancroft,1974 *Current Themes in Psychiatry 2* Raghu N. Gaind,Barbara L. Hudson,1979-06-17 **The Causes and Cures of Criminality** Hans J. Eysenck,Gisli H. Gudjonsson,2013-03-09 The title that the authors have chosen for this book *The Causes and Cures of Criminality* suggests that it may be just another book speculating on the sociological evils that need to be put right for everything in the garden to be lovely If this is the expectation the reader could not be more mistaken The recurrent theme in fact is a strong accent on psychological experiments Both authors have tackled the theoretical and practical side of crime through an exhaustive literature review of past experimental work Hans J Eysenck has concentrated on the constitutional and biological theory of criminality whereas Gisli Gudjonsson has concerned himself more with a review of ongoing research into therapy and possible prevention of antisocial behavior Part I goes into considerable detail on the causes of criminality stressing much of the strangely neglected area of individual differences in personality Research studies point to a very heavy involvement of heredity in the causation of criminality but the authors are careful to acknowledge that much can be done environmentally to discourage a life of crime once those persons who are at risk have been identified *International Handbook of Cognitive and Behavioural Treatments for Psychological Disorders* V.E. Caballo,1998-11-27 This handbook shows the wide perspective cognitive behavioural treatment can offer to health professionals the vast majority of whom now recognize that cognitive behavioural procedures are very useful in treating many mental disorders even if certain disciplines continue to favour other kinds of treatment This book offers a wide range of structured programmes for the treatment of various psychological psychiatric disorders as classified by the DSM IV The layout will be familiar to the majority of health professionals in the description of mental disorders and their later treatment It is divided into seven sections covering anxiety disorders sexual disorders dissociative somatoform impulse control disorders emotional disorders and psychotic and organic disorders Throughout the twenty three chapters this book offers the health professional a structured guide with which to start tackling a whole series of mental disorders and offers pointers as to where to find more detailed information The programmes outlined should it is hoped prove more effective than previous approaches with lower economic costs and time investment for the patient and therapist
