**Alternative Internet** Chris Atton, 2020-03-31 This book explores how the Internet presents radical ways of organising and producing media that offer political and cultural alternatives both to ways of doing business and to how we understand the world and our place in it The book is characterised by in depth case studies Topics include the media of new social movements and other radical political organisations including the far right websites produced by fans of popular culture and media dedicated to developing a critical public journalism It locates these studies in appropriate theoretical and historical contexts while remaining accessible to a student audience Major themes The use of the Internet by political groups such as the anti capitalist and environmental movements as well as the far right Radical forms of creativity and distribution the anti copyright and sampling file sharing movements and their role as cultural critics in a corporate world The development and maintenance of a global digital public sphere of protest through such practices as hacktivism The use of new media technologies to transform existing media forms and practices such as news media and Internet radio This is the first book devoted entirely to alternative ways of political organisation and cultural production on the Internet The author is one of the leading international experts in the study of alternative media and this book is an authoritative guide to all aspects of these phenomena the cultural the political the economic and the social The range of topics covered will make it an attractive text for a wide range of media and cultural studies and computing courses *Internet and Surveillance* Christian Fuchs, Kees Boersma, Anders Albrechtslund, Marisol Sandoval, 2013-06-17

The Internet has been transformed in the past years from a system primarily oriented on information provision into a medium for communication and community building The notion of Web 2.0 social software and social networking sites such as Facebook Twitter and MySpace have emerged in this context With such platforms comes the massive provision and storage of personal data that are systematically evaluated marketed and used for targeting users with advertising In a world of global economic competition economic crisis and fear of terrorism after 9/11 both corporations and state institutions have a growing interest in accessing this personal data Here contributors explore this changing landscape by addressing topics such as commercial data collection by advertising consumer sites and interactive media self disclosure in the social web surveillance of file sharers privacy in the age of the internet civil watch surveillance on social networking sites and networked interactive surveillance in transnational space This book is a result of a research action launched by the intergovernmental network COST European Cooperation in Science and Technology

**The Internet, Politics, and Inequality in Contemporary Brazil** Helton Levy, 2018-10-15 The Internet Politics and Inequality in Contemporary Brazil Peripheral Media offers a new understanding of the digital media produced from the favelas urban occupations and in the countryside of Brazil focusing on the discourse of this broad periphery in the late 2010s After a decade of political stabilization and economic growth the contemporary periphery has the ability to employ digital media to politicize old demands for social justice and better public services and to denaturalize inequality overall The

Internet Politics and Inequality in Contemporary Brazil presents interviews conducted with producers acting in the cities outskirts in favelas and in the countryside showing how a myriad of websites and social media pages can launch specific challenges against hegemonic mass media outlets the state and society A vast body of research reveals producers strategies to garner publicity for marginalized neighborhoods and individuals providing an essential background for scholars of Latin American studies journalism and communication

*The Online Advertising Tax as the Foundation of a Public Service Internet* Christian Fuchs,2018-06-20 Online advertising will soon form the largest share of global advertisement revenues Google and Facebook netted profits of US 29 billion in 2016 While these two giants control more than 66% of all online advertising revenues complex legal company structures have minimised their tax liabilities This extended policy report considers where they should be taxed and where the value of their activities is actually created It argues that tax paid by those platforms should be levied in the country where platform users are located when they click on or view an advertisement Furthermore the report examines the practical steps needed to ensure transparent accounting of taxed transactions in order to avoid long term negative effects for media and democracy Considering counter arguments the author makes the case for an online advertising tax alongside a public service Internet strategy that could support other viable platforms and counter the dangers of duopoly or oligopoly and the high risks of financial bubbles in a world where advertising is the Internet s dominant business model

*The Turn to Infrastructure in Internet Governance* Francesca Musiani,Derrick L. Cogburn,Laura DeNardis,Nanette S. Levinson,2016-03-02 This edited volume brings together experts from around the world to provide coverage and analysis of infrastructure s role in Internet governance both now and in the future Never in history have conflicts over Internet governance attracted such widespread attention High profile controversies include the disclosures about NSA surveillance by intelligence analyst Edward Snowden controversy over a decision by the US government to relinquish its historic oversight of Internet names and numbers and countless cybersecurity breaches involving unauthorized access to Internet users personal data Much of the Internet governance ecosystem both technical architecture and coordinating institutions is behind the scenes but increasingly carries significant public interest implications An area once concealed in institutional and technological complexity is now rightly bracketed among other shared global issues such as environmental protection and human rights that have considerable global implications but are simply incongruous with national borders This transformation into an era of global governance by Internet infrastructure presents a moment of opportunity for scholars to bring these politicized infrastructures to the foreground

*Information Technology Outlook 2002 ICTs and the Information Economy* OECD,2002-06-21 This volume describes the main trends in industries and businesses supplying IT goods and services It looks at the impact of IT diffusion and applications as well as the growing importance of network effects as the use of IT expands

**Shinners, Dissos and Dissenters: Irish republican media activism since the Good Friday Agreement** Paddy Hoey,2018-01-17 Shinners

dissos and dissenters is a long term analysis of the development of Irish republican media activism since 1998 and the tumultuous years that followed the end of the Troubles It is the first in depth analysis of the newspapers magazines and online spaces in which strands of Irish republicanism developed and were articulated in a period in which schism and dissent underscored a return to violence for dissidents Based on an analysis of Irish republican media outlets as well as interviews with the key activists that produced them this book provides a compelling snap shot of a political ideology in transition as it is moulded by the forces of the Peace Process and often violent internal ideological schism that threatened a return to the bad old days of the Troubles

*An Alternative Internet* Chris Atton,2004 This book explores how the Internet presents radical ways of organising and producing media that offer political and cultural alternatives both to ways of doing business and to how we understand the world and our place in it The book is characterised by in depth case studies Topics include the media of new social movements and other radical political organisations including the far right websites produced by fans of popular culture and media dedicated to developing a critical public journalism It locates these studies in appropriate theoretical and historical contexts while remaining accessible to a student audience Major themes The use of the Internet by political groups such as the anti capitalist and environmental movements as well as the far right Radical forms of creativity and distribution the anti copyright and sampling file sharing movements and their role as cultural critics in a corporate world The development and maintenance of a global digital public sphere of protest through such practices as hacktivism The use of new media technologies to transform existing media forms and practices such as news media and Internet radio This is the first book devoted entirely to alternative ways of political organisation and cultural production on the Internet The author is one of the leading international experts in the study of alternative media and this book is an authoritative guide to all aspects of these phenomena the cultural the political the economic and the social The range of topics covered will make it an attractive text for a wide range of media and cultural studies and computing courses
