**Communicating from the Inside Out** Barbara Bullard, Kat Carroll, 1993 *Communication Theory* Karsten Pedersen, 2025-03-28 Communication Theory provides a theoretically informed exploration of diverse communication theories. It serves as a meta discussion on the description and characterization of communication from various theoretical standpoints. The book also examines how different theoretical perspectives approach communication and how these approaches can be both conflicting and complementary. The book illustrates the concept of human communication by demonstrating that despite different theoretical lenses all human communication shares fundamental characteristics. This underscores the importance of employing multiple perspectives to emphasize various aspects of communication in order to describe different facets of the communication process.

**Handbook of Public Communication of Science and Technology** Massimiano Bucchi, Brian Trench, 2008-06-03 Comprehensive yet accessible this key Handbook provides an up to date overview of the fast growing and increasingly important area of public communication of science and technology from both research and practical perspectives. As well as introducing the main issues, arenas and professional perspectives involved it presents the findings of earlier research and the conclusions previously drawn. Unlike most existing books on this topic this unique volume couples an overview of the practical problems faced by practitioners with a thorough review of relevant literature and research. The practical Handbook format ensures it is a student friendly resource but its breadth of scope and impressive contributors means that it is also ideal for practitioners and professionals working in the field. Combining the contributions of different disciplines: media and journalism studies, sociology and history of science, the perspectives of different geographical and cultural contexts and by selecting key contributions from appropriate and well respected authors this original text provides an interdisciplinary as well as a global approach to public communication of science and technology.

**Environmental Communication Pedagogy and Practice** Tema Milstein, Mairi Pileggi, Eric L Morgan, 2017-02-24 Given the urgency of environmental problems how we communicate about our ecological relations is crucial. Contributors address how pedagogy can stimulate ecological wakefulness, support diverse and praxis based ways of learning and nurture environmental change agents. Additionally the volume responds to a practical need to increase teaching effectiveness of environmental communication across disciplines by offering a repertoire of useful learning activities and assignments. Altogether it provides an impetus for reflection upon and enhancement of our own practice as environmental educators, practitioners and students. Environmental Communication Pedagogy and Practice is an essential resource for those working in environmental communication: environmental and sustainability studies, environmental journalism, environmental planning and management, environmental

sciences media studies and cultural studies as well as communication subfields such as rhetoric conflict and mediation and intercultural The volume is also a valuable resource for environmental communication professionals working with communities and governmental and non governmental environmental organisations
