Communicating Mathematics in the Digital Era Jonathan Borwein, E.M. Rocha, Jose Francisco Rodrigues, 2008-10-31
The digital era has dramatically changed the ways that researchers search produce publish and disseminate their scientific work These processes are still rapidly evolving due to improvements in information science new achievements in computer science technologies and initiatives such as DML and open access journals digitization projects sci

Communicating Mathematics Timothy Y. Chow, Daniel C. Isaksen, 2009-02-12 This volume contains the proceedings of a conference held in July 2007 at the University of Minnesota Duluth in honor of Joseph A Gallian s 65th birthday and the 30th anniversary of the Duluth Research Experience for Undergraduates In keeping with Gallian s extraordinary expository ability and broad mathematical interests the articles in this volume span a wide variety of mathematical topics including algebraic topology combinatorics design theory forcing game theory geometry graph theory group theory optimization and probability Some of the papers are purely expository while others are research articles The papers are intended to be accessible to a general mathematics audience including first year or second year graduate students This volume should be especially useful for mathematicians seeking a new research area as well as those looking to enrich themselves and their research programs by learning about problems and techniques used in other areas of mathematics

Multimedia Tools for Communicating Mathematics Jonathan Borwein, Maria H. Morales, Konrad Polthier, Jose F. Rodrigues, 2012-12-06 This book on multimedia tools for communicating mathematics arose from presentations at an international workshop organized by the Centro de Matematica e Aplicacoes Fundamentais at the University of Lisbon in November 2000 with the collaboration of the Sonderforschungsbereich 288 at the University of Technology in Berlin and of the Centre for Experimental and Constructive Mathematics at Simon Fraser University in Burnaby Canada The MTCM2000 meeting aimed at the scientific methods and algorithms at work inside multimedia tools and it provided an overview of the range of present multimedia projects of their limitations and the underlying mathematical problems This book presents some of the tools and algorithms currently being used to create new ways of making enhanced interactive presentations and multimedia courses It is an invaluable and up to date reference book on multimedia tools presently available for mathematics and related subjects

Teaching Students to Communicate Mathematically Laney Sammons, 2018-04-04 Students learning math are expected to do more than just solve problems they must also be able to demonstrate their thinking and share their ideas both orally and in writing As many classroom teachers have discovered these can be challenging tasks for students The good news is mathematical communication can be taught and mastered In Teaching Students to Communicate Mathematically Laney Sammons provides practical assistance for K 8 classroom teachers Drawing on her vast knowledge and experience as a classroom teacher she covers the basics of effective mathematical communication and offers specific strategies for teaching students how to speak and write about math Sammons also presents useful suggestions for helping students incorporate correct vocabulary and

appropriate representations when presenting their mathematical ideas This must have resource will help you help your students improve their understanding of and their skill and confidence in mathematical communication **Communicating Mathematics in the Digital Era** Jonathan Borwein,E.M. Jo's hand shot up and he immediately responded Well seven is all straight lines and sixes are all curly How can you help children to make progress in mathematical understanding Children's mathematical misconceptions very often arise as a result of poor communication This practical and innovative book presents a range of creative strategies to help teachers communicate effectively in the mathematics classroom offering some new ways of presenting the fundamental concepts and principles of mathematics and clearly demonstrating that the most effective form of communication is not always verbal Each chapter focuses on a theme or concept central to the numeracy strategy such as subtraction shape and space constructing and connecting 2D and 3D shapes data logging and graph interpretation and mathematical reasoning Each chapter supports teachers' subject knowledge as well as suggesting a range of communication strategies e.g. speaking listening drawing role play and visual methods such as posters and ICT work to help teachers and children to share and build on their understanding All of the activities have been tried and tested in classrooms across Europe Written by a team of highly experienced teachers the book will be valuable reading for pre and in service teachers teacher educators and anyone who has an interest in extending the ways children actively engage with mathematics Teachers with EAL pupils in their class may find it of particular value in communicating mathematical concepts to those who find English difficult

Providing a Foundation for Teaching Mathematics in the Middle Grades Judith Sowder, Bonnie P. Schappelle, 1995-08-03 This book is written primarily for middle grade teachers who are discovering that they now want to teach in ways that create positive mathematical learning environments and instigate rich classroom discourse Many of these teachers are finding that their mathematical preparation did not address the complexities underlying the mathematics they now want to teach
