American Highway:

The American Highway William Kaszynski, 2000-01-01 Minnesota based writer and photographer Kaszynski traces the transformation of the US from a network of places connected by rutted wagon trails to a maze of highways connected to other highways He describes and illustrates road and bridge construction and the new roadside culture that threw up motels restaurants gas stations and scenic perspectives *Inter-American Highway on Highways* United States. Congress. House. Committee on Foreign Affairs, 1929 **Report on the Inter-American Highway** United States. Congress. Senate. Committee on Public Works, Dennis Chavez, 1961 **American Highway & Transportation Monthly**, 1927 The Pan American Highway System Organization of American States, 1969 **Report on Progress on the Inter-American Highway** United States. Congress. Senate. Committee on Public Works, 1962 **American Highways**, 1927 **The Longest Line on the Map** Eric Rutkow, 2019-12-10 From the award winning author of *American Canopy* a dazzling account of the world's longest road the Pan American Highway and the epic quest to link North and South America a dramatic story of commerce technology politics and the divergent fates of the Americas in the nineteenth and twentieth centuries The Pan American Highway monument to a century's worth of diplomacy and investment education and engineering scandal and sweat is the longest road in the world passable everywhere save the mythic Darien Gap that straddles Panama and Colombia The highway's history however has long remained a mystery a story scattered among government archives private papers and fading memories In contrast to the Panama Canal and its vast literature the Pan American Highway the United States other great twentieth century hemispheric infrastructure project has become an orphan of the past effectively erased from the story of the American Century *The Longest Line on the Map* uncovers this incredible tale for the first time and weaves it into a tapestry that fascinates informs and delights Rutkow's narrative forces the reader to take seriously the question Why couldn't the Americas have become a single region that is and not two near irreconcilable halves that are Whether you're fascinated by the history of the Americas or you've dreamed of driving around the globe or you simply love world records and the stories behind them *The Longest Line on the Map* is a riveting narrative a lost epic of hemispheric scale **American Highways**, 1951 **Special Pan American Highway Congress, Mexico City...Mexico, October 26-November 1, 1952** Pan American Highway Congress (Special) Mexico, 1953 **The American Road** Katherine M. Johnson, 2021-06-23 In *The American Road* Katherine M Johnson develops a bold new theory for how the American highway system has taken on such outsized scale and complexity by emphasizing the emergence of a powerful administrative apparatus in the American federal system Established in 1914 expressly to intervene in the congressional debates of the era the American highway bureaucracy consisted of forty eight state highway officials acting in and through their self organized association the American Association of State Highway Officials Johnson's central argument is that this new institution occupied a similar position relative to the American state as political parties and courts did The capacity to organize across a complex constitutional

order enabled it to control the purpose and allocation of federal highway aid for the better part of the twentieth century Johnson investigates this new conception of the American highway bureaucracy showing specifically where and how that extraconstitutional authority emerged expanded and manifested itself in the legislative history physical dimensions and geographical reach of the emerging highway system The American Road reveals that all of the major highway legislation approved by Congress from 1916 to 1941 was collectively developed and advanced by state and federal highway bureaucrats drawing on the new authority conferred by the system of federal grants in aid which required state legislatures to provide a state matching grant and local governments to relinquish control over decisions of location and design The capacity to advance their policy aims through both the advice of experts and the will of the states not only secured the new highway program against renewed opposition in Congress in the 1920s but also won the strong support of the motor vehicle industry and set the stage for even more impressive policy gains of the 1930s when highways became the largest category of federal emergency public works That collective authority however required a high threshold of consensus to secure and maintain producing not just a narrow one size fits all approach to technical issues but also a striking incapacity to respond to changing conditions Johnson completes her compelling narrative by identifying the source of the interstate highway plan first proposed in 1939 and finally funded in 1956 in the internal dynamics of and external threats to that extraconstitutional authority
