## **American Ecclesiastes:**

*The theory of the kingdom: A unified model of human agency* Andrew Root, 2024-01-02 This original monograph presents a comprehensive theory regarding the economy of the kingdom of God. The theory and associated model will help individuals make better choices. The research integrates fundamentals of the temporal real economy and the permanent economy of the kingdom of God to present a unified model of human agency. According to the model, effective agents are salt and light in the real economy, arresting corruption and revealing the truth. Effective agency produces life, peace, and growth. Individual and organizational practices that arrest corruption and reveal truth can resolve longstanding economic grievances. The list of spiritual credence goods is extensive and includes commonly known virtues such as humility, patience, and hope. Spiritual goods are allocated based on the owner-agent relationship. The quantity of goods the owner supplies is in proportion to an individual's sacrificial offering of time and money. Spiritual goods are stored as heart capital. In a process analogous to the real economy, heart labor applied to heart capital produces desirable outputs. The owner relates to his agents through a heart-inscribed behavioral contract. The owner generally intervenes in the real economy by communicating with agents rather than by restricting choice. Prior studies across economics, finance, and sociology prove the efficiency of behavioral contracts and communication over restricted choice. Herein, researchers will find new testable propositions, and practitioners will find new ideas and practices to live better, more consequential lives. Examples of practical applications include methods of resolving group-level bias and understanding the purpose of life's difficulties.
