American Overthrow:

America in Retreat Michael Pembroke, 2021-01-28 The story of how America turned its back on the world In the heady days after 1945 the authority of the United States was unrivalled and with the founding of the UN a new era of international co operation seemed to have begun But seventy five years later its influence has already diminished The world has now entered a post American era argues Michael Pembroke defined by a flourishing Asia and the ascendancy of China as much as by the decline of the United States This book is a short history of that decline how high standards and treasured principles were ignored how idealism was replaced by hubris and moral compromise and how adherence to the rule of law became selective It is also a look into the future a future dominated by greater Asia and China in particular We are in the midst of the third great power shift in modern history from Europe to America to Asia Covering wars in Korea Vietnam Iraq and Afghanistan interventions in Iran Guatemala and Chile and a retreat from international engagement with the UN WHO and increasingly trade agreements Pembroke sketches the history of America s retreat from universal principles to provide a clear eyed analysis of the dangers of American exceptionalism

Presidential Decisions for War Gary R. Hess, 2009-03-01 Following World War II Americans expected that the United States would wage

another major war against a superpower Instead the nation has fought limited wars against much weaker states such as North Korea North Vietnam and Iraq This revised and updated edition of *Presidential Decisions for War* analyzes the means by which four presidents have taken the nation to war and assesses the effectiveness of each president's leadership during those conflicts Gary Hess recreates the unfolding crises in Korea Vietnam and Iraq to probe the reasons why Presidents Truman Johnson George H W Bush and George W Bush and their advisors decided in favor of war He compares the performance of the commanders in chief and evaluates how effectively each understood U S interests explored alternatives to war adhered to constitutional processes and built congressional popular and international support A new conclusion points out that unlike the administrations of Truman Johnson and the elder Bush George W Bush's White House actively sought to change the international order through preemptive war and aggressive democracy building Fully revised and featuring an examination of how each of the presidents learned from history and juggled the demands on diplomacy this comparative study of presidential war making elucidates how effective executive leadership or its absence directly affects the outcome of wars

The American Federationist, 1921 Includes separately paged Junior union section Humans: The 300,000-Year Struggle for Equality ALVIN FINKEL, 2024-09-13 This is a history of humanity like it's never been told before Historian Alvin Finkel builds on the work of archaeologists anthropologists and historians to present the very long view of the history of the human species His focus is not on the leaders whose exploits are recounted in traditional histories but rather on the experiences of ordinary people the 99% whose experiences and activities are often overlooked In the extensive research of many contemporary scholars Alvin Finkel notes a common thread which most historians have ignored the constant efforts of ordinary people throughout history to create and sustain societies based on equality of all individuals Contrary to traditional historical writing he finds that the earliest human communities usually treated all individuals as equals In the histories of societies all around the world he records how individuals who found ways to gain wealth and power have faced constant often successful resistance from the rest From the first recorded communities in Mesopotamia to the COVID 19 pandemic this book features the resistances uprisings struggles and solidarities of the majority against those seeking to dominate The result is a fresh and challenging interpretation of the history of our species one that casts a new light on the true nature of humans
