Visualizing Data Patterns with Micromaps Daniel B. Carr,Linda Williams Pickle,2010-04-29 After more than 15 years of development drawing on research in cognitive psychology statistical graphics computer science and cartography micromap designs are becoming part of mainstream statistical visualizations Bringing together the research of two leaders in this field Visualizing Data Patterns with Micromaps presents the many design vari **Explaining Data Patterns using Knowledge from the Web of Data** Arnoud de Kemp,2018-07-15 Knowledge Discovery KD is a field with a long tradition aimed at developing methodologies to detect hidden patterns and regularities in large datasets using techniques from a wide range of domains such as statistics machine learning pattern recognition and data visualisation In most real world contexts the interpretation and explanation of the discovered patterns is left to human experts who use their background knowledge to analyse refine and make the patterns understandable for the intended purpose Explaining patterns is therefore an intensive and time consuming process where parts of the knowledge can remain unrevealed especially when the experts lack some of the required background knowledge In this publication the author investigates the hypothesis that such an interpretation process can be facilitated by introducing background knowledge from the Web of Linked Data In the last decade many areas started publishing and sharing their domain specific knowledge in the form of structured data with the objective of encouraging information sharing reuse and discovery The author s view is that with a constantly increasing amount of shared and connected knowledge the process of explaining patterns can become easier faster and more automated To demonstrate this Dedalo was developed a framework that automatically provides explanations for patterns of data using background knowledge extracted from the Web of Data The author studied the elements required for a piece of information to be considered an explanation identified the best strategies to automatically find the right piece of information in the Web of Data and designed a process able to produce explanations to a given pattern using the background knowledge autonomously collected from the Web of Data The final evaluation of Dedalo involved users within an empirical study based on a real world scenario The author has demonstrated that the explanation process is complex when one is not familiar with the domain of usage but also that this can be simplified considerably by using the Web of Data as a source of background knowledge The author Ilaria Tiddi has won the SWSA Distinguished Dissertation Award 2017 for this publication *Longitudinal Data Analysis* Donald Hedeker,Robert D. Gibbons,2006-05-12 Longitudinal data analysis for biomedical and behavioral sciences This innovative book sets forth and describes methods for the analysis of longitudinaldata emphasizing applications to problems in the biomedical and behavioral sciences Reflecting the growing importance and use of longitudinal data across many areas of research the text is designed to help users of statistics better analyze and understand this type of data Much of the material from the book grew out of a course taught by Dr Hedeker on longitudinal data analysis The material is therefore thoroughly classroom tested and includes a number of features designed to help readers better understand and apply the

material Statistical procedures featured within the text include Repeated measures analysis of variance Multivariate analysis of variance for repeated measures Random effects regression models RRM Covariance pattern models Generalized estimating equations GEE models Generalizations of RRM and GEE for categorical outcomes Practical in their approach the authors emphasize the applications of the methods using real world examples for illustration Some syntax examples are provided although the authors do not generally focus on software in this book Several datasets and computer syntax examples are posted on this title s companion Web site The authors intend to keep the syntax examples current as new versions of the software programs emerge This text is designed for both undergraduate and graduate courses in longitudinal data analysis Instructors can take advantage of overheads and additional course materials available online for adopters Applied statisticians in biomedicine and the social sciences can also use the book as a convenient reference   <u>Railway Machinery</u> ,1905   **Foundry** ,1909   *Machinery* ,1905   **Signal** ,1993   *Transactions* American Foundrymen's Society,1921 Vols 5 6 9 include the Proceedings of the annual meeting   **The Metal Worker, Plumber and Steam Fitter** ,1914   *Iron Age and Hardware, Iron and Industrial Reporter* ,1925   *Transactions of the American Foundrymen's Association* ,1921 Vols for 1915 include proceedings of the annual meeting   *Engineer's Year-book of Formulae, Rules, Tables, Data, and Memoranda* ,1918   *Metal Industry and the Iron Foundry* ,1922   **Journal of Morphology and Physiology** ,1930   **Contributions** Smith College.
