Data Refinement:

Data Refinement W.-P. de Roever, Kai Engelhardt, 1998-12-03 The goal of this book is to provide a comprehensive and systematic introduction to the important and highly applicable method of data refinement and the simulation methods used for proving its correctness The authors concentrate in the first part on the general principles needed to prove data refinement correct They begin with an explanation of the fundamental notions showing that data refinement proofs reduce to proving simulation The book's second part contains a detailed survey of important methods in this field which are carefully analysed and shown to be either incomplete with counterexamples to their application or to be always applicable whenever data refinement holds This is shown by proving for the first time that all these methods can be described and analysed in terms of two simple notions forward and backward simulation The book is self contained going from advanced undergraduate level and taking the reader to the state of the art in methods for proving simulation

A Theory and Practice of Program Development Derek J. Andrews, 2012-12-06 A Theory and Practice of Program Development provides a comprehensive introduction to a software development method based on VDM SL Each development step is rigorously justified and the strategies and transformations used are justified and explained mathematically The approach provides the formal semantics of a simple but powerful wide spectrum programming language and gives a formal definition of both algorithmic and data refinement Unlike other texts it covers both the theory and practice of program development Although based on VDM SL no knowledge of this language is assumed thus making it widely accessible A Theory and Practice of Program Development is intended for 3rd 4th year undergraduate and postgraduate students taking formal methods and software engineering software developers involved in the production of provably correct computer systems and reusable design and the problems of reusable code
