P. Chen, Frederick H. Lochovsky, 1999 These conference papers cover the 6th International Conference on Database Systems for Advanced Applications They examine topics such as the World Wide Web workflow management and specification management visualization and multimedia databases spatial databases and index techniques *Advanced Database Systems For Integration Of Media And User Environments '98: Advanced Database Research* Yahiko Kambayashi, Akifumi Makinouchi, Yoshifumi Masunaga, Shunsuke Uemura, Katsumi Tanaka, 1998-03-31 **Advances in Object-Oriented Information Systems** Jean-Michel Bruel, Zohra Bellahsene, 2003-08-02 For the first time four workshops have been held in conjunction with the 8th Object Oriented Information Systems conference OOIS 2002 to encourage interaction between researchers and practitioners Workshop topics are of course inline with the conference's scientific scope and provide a forum for groups of researchers and practitioners to meet together more closely and to exchange opinions and advanced ideas and to share preliminary results on focused issues in an atmosphere that fosters interaction and problem solving The conference hosted four one day workshops The four selected workshops were fully in the spirit of a workshop session hosted by a main conference Indeed OOIS deals with all the topics related to the use of object oriented techniques for the development of information systems The four workshops are very specific and contribute to enlarging the spectrum of the more general topics treated in the main conference The first workshop focused on a very specific and key concept of object oriented development the specialization generalization hierarchy The second one explored the use of non traditional approaches at the edge of object oriented techniques such as aspects AI etc to improve reuse The third workshop dealt with optimization in Web based information systems And finally the fourth workshop investigated issues related to model driven software development 7th International Conference on Database Systems for Advanced Applications (DAS-FAA 2001) Dik Lun Lee, 2001 Annotation Proceedings of an April 2001 conference examining recent progress in XML databases data mining and clustering document and text databases deductive and knowledge bases OLAP indexing techniques mobile computing and databases query languages and processing workflow management visualization and multimedia databases query processing and optimization

N. Zobel,1987 **Index of Conference Proceedings** ,1993 *Interfaces to Database Systems (IDS92)* Richard Cooper,1993 Despite the volume of research carried out into the design of database systems and the design of user interfaces there is little cross fertilization between the two areas The control of user interfaces to database systems is therefore significantly less advanced than other aspects of DBMS design As database functionality is used in a wider range of areas such as design applications the suitability of the user interface is becoming increasingly important It is therefore necessary to begin applying the knowledge developed by HCI researchers to the specialised domain of database systems This volume contains revised papers from the International Workshop on Interfaces to Database Systems held in Glasgow 1 3 July 1992 The workshop aimed to develop an interaction between the design of database systems and user interfaces It discussed both the production of interfaces tailored to particular applications and also more general systems within which interfaces can be developed Some of the papers concentrate on usability aspects some discuss different interface metaphors whilst others tackle the question of designing a general conceptual model The latter topic is of particular importance as it is only by achieving an abstract model of what the user understands to be in the database that the data can be associated with appropriate interface facilities Among the contents of the volume are integrated interfaces to publicly available databases database query interface for medical information systems an integrated approach to task oriented database retrieval interfaces GRADI a graphical database interface for a multimedia DBMS cognitive view mechanism for multimedia information systems a graphical schema

representation for object oriented databases a conceptual framework for error analysis in SQL interfaces a browser for a version entity relationship database Interfaces to Database Systems IDS92 is unique in that it brings together a variety of approaches from the database and HCI research communities It will provide essential reading for researchers of database systems and also industrial developers of DBMS **Advanced Database Systems** Nabil R. Adam, Bharat K.
