life and placing these in the cultural context of seventeenth century Europe Descartes early work in mathematics and science produced ground breaking theories methods and tools still in use today This book gives the first full account of how this work informed and influenced the later philosophical studies for which above all Descartes is renowned Not only were philosophy and science intertwined in Descartes life so were philosophy and religion The Church of Rome found Galileo guilty of heresy in 1633 two decades earlier Copernicus theories about the universe had been denounced as blasphemous To avoid such accusations Descartes clothed his views about the relation between God and humanity and about the nature of the universe in a philosophical garb acceptable to the Church His most famous project was the exploration of the foundations of human knowledge starting from the proof of one s own existence offered in the formula Cogito ergo sum I am thinking therefore I exist Stephen Gaukroger argues that this was not intended as an exercise in philosophical scepticism but rather to provide Descartes scientific theories influenced as they were by Copernicus and Galileo with metaphysical legitimation This book offers for the first time a full understanding of how Descartes developed his revolutionary ideas It will be welcomed by all readers interested in the origins of modern thought

Regulae ad directionem ingenii / Rules for the Direction of the Natural Intelligence René Descartes, 2024-01-15 Exactly four hundred years after the birth of Ren Descartes 1596 1650 the present volume now makes available for the first time in a bilingual philosophical edition prepared especially for English speaking readers his Regulae ad directionem ingenii Rules for the Direction of the Natural Intelligence 1619 1628 the Cartesian treatise on method This unique edition contains an improved version of the original Latin text a new English translation intended to be as literal as possible and as liberal as necessary an interpretive essay contextualizing the text historically philologically and philosophically a comprehensive index of Latin terms a key glossary of English equivalents and an extensive bibliography covering all aspects of Descartes methodology Stephen Gaukroger has shown in his authoritative Descartes An Intellectual Biography 1995 that one cannot

understand Descartes without understanding the early Descartes But one also cannot understand the early Descartes without understanding the Regulae Rules Nor can one understand the Regulae Rules without understanding a philosophical edition thereof Therein lies the justification for this project The edition is intended not only for students and teachers of philosophy as well as of related disciplines such as literary and cultural criticism but also for anyone interested in seriously reflecting on the nature expression and exercise of human intelligence What is it How does it manifest itself How does it function How can one make the most of what one has of it Is it equally distributed in all human beings What is natural about it and what not In the Regulae Rules Descartes tries to provide from a distinctively early modern perspective answers both to these and to many other questions about what he refers to as ingenium *Discours de la méthode ... par Descartes* René Descartes, 1647

Rene Descartes Rene Descartes, 2017-01-05 Rene Descartes Discourse on the Method of Rightly Conducting the Reason and Seeking Truth in the Sciences by Rene Descartes The Discourse on the Method French *Discours de la methode* is a philosophical and autobiographical treatise published by Ren Descartes in 1637 Its full name is Discourse on the Method of Rightly Conducting One s Reason and of Seeking Truth in the Sciences French title *Discours de la methode pour bien conduire sa raison et chercher la v rit dans les sciences* The Discourse on The Method is best known as the source of the famous quotation *Je pense donc je suis* I think therefore I am which occurs in Part IV of the work Good sense is of all things among men the most equally distributed for every one thinks himself so abundantly provided with it that those even who are the most difficult to satisfy in everything else do not usually desire a larger measure of this quality than they already possess And in this it is not likely that all are mistaken the conviction is rather to be held as testifying that the power of judging aright and of distinguishing truth from error which is properly what is called good sense or reason is by nature equal in all men and that the diversity of our opinions consequently does not arise from some being endowed with a larger share of reason than others but solely from this that we conduct our thoughts along different ways and do not fix our attention on the same objects For to be possessed of a vigorous mind is not enough the prime requisite is rightly to apply it The greatest minds as they are capable of the highest excellences are open likewise to the greatest aberrations and those who travel very slowly may yet make far greater progress provided they keep always to the straight road than those who while they run forsake it
